FISCHERSPORTS.COM

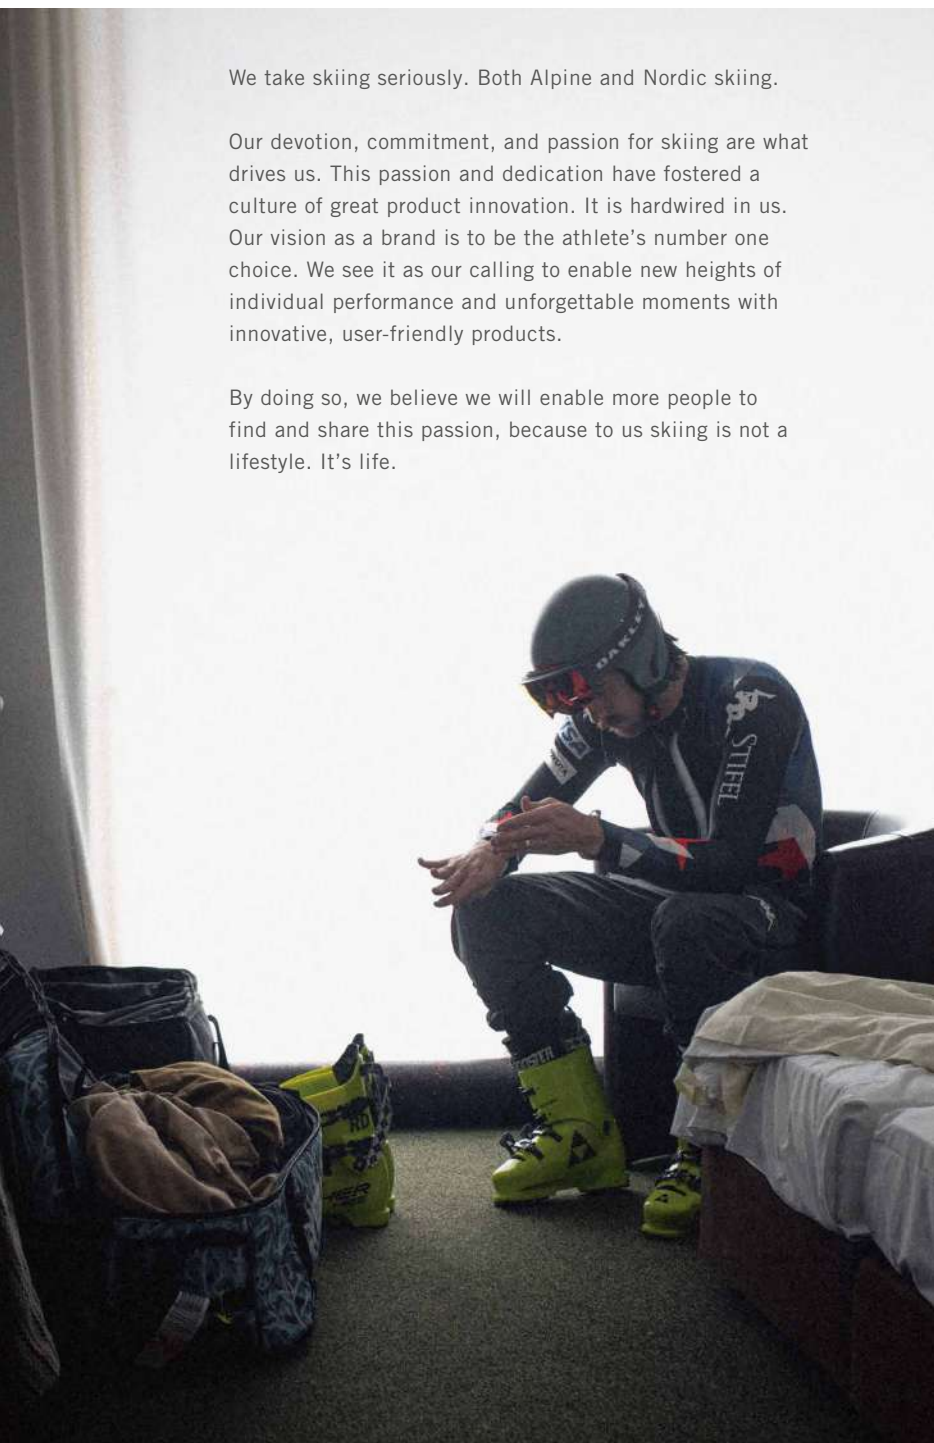

#LIVETOSKI

We take skiing seriously. Both Alpine and Nordic skiing.

Our devotion, commitment, and passion for skiing are what drives us. This passion and dedication have fostered a culture of great product innovation. It is hardwired in us. Our vision as a brand is to be the athlete's number one choice. We see it as our calling to enable new heights of individual performance and unforgettable moments with innovative, user-friendly products.

By doing so, we believe we will enable more people to find and share this passion, because to us skiing is not a lifestyle. It's life.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.
FISCHERSPORTS.COM

THE CHOICE IS YOURS

We design our skis and boots to meet your exact needs as a skier. Every Fischer product has specific features and technology to make your skiing exhilarating and enjoyable. It's easy to find the right gear for the skiing that you do.

Fischer offers three distinct performance collections of Alpine skis, boots and bindings. Whatever you need, want and love in Alpine skis and equipment, Fischer makes it easy to find.

The final product offer should be taken from the country price lists. Colors and technical specifications in the catalog may deviate from the original. Rights reserved for unannounced changes and typographical errors. © October 2024.

RC4 **NOIZE**

Born on the race courses, these skis were developed in collaboration with our World Cup athletes and built for the demands of real racers, expert skiers and speed enthusiasts. Featuring the cutting-edge Noize Control™ Technology with the Noize Structure, a Solid Wood Core and the precision-cut Shaped TI, the next generation of RC4 skis minimize vibrations for smoother runs, enhance control throughout the turn, and deliver unparalleled efficiency for the best possible performance and ultimate skiing experience. Now it's up to you to make perfect turns, accelerate faster and win your race.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

THE CURV GT REDEFINE

Introducing the Fischer Curv GT Redefine, a brand new concept in the direction of a more sustainable skiing experience.

Beyond Fischer's ongoing commitment to environmental responsibility, including the use of geothermal heat, solar panels, eco-friendly packaging, and many more actions, the Curv GT is an innovation to bring sustainability down to the product itself. This concept ski is not merely a product, it's a testament to Fischer's dedication to pushing the boundaries of eco-conscious manufacturing. The Curv GT doesn't just minimize its carbon footprint, it redefines it.

Through meticulous selection of sustainable materials and a focus on economical CO₂ processes, Fischer is pushing to establish more environmentally-conscious ski construction. In line with our global efforts, the Curv GT is produced locally, reducing shipping distances and further minimizing its environmental impact.

THE CO₂ EQUIVALENT SAVINGS BASED ON MATERIALS

Comparable ski

The Curv GT Redefine

THE IMPACT OF THE CURV GT REDEFINE

Beside the fact that the Curv GT Redefine is 100% produced in Austria with an energy efficient supply chain, The Curv GT Redefine is the next step in the direction of environmentally-friendly and resource-saving production of skis. The CO₂ equivalent is audited with external independent agencies and helps to compare the impact of different materials. In the case of The Curv GT Redefine, the ski saves 36% CO₂ equivalent in general, 100% in the plate, 51% in Titanal and 25% in composites relative to a comparable ski. The goal for the future is to continue to reduce these CO₂ equivalents.

Join us on the journey towards a greener future with the Fischer Curv GT Redefine, where sustainability meets innovation on the slopes.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

CRAFTED TO SKI MORE.

THE NEW RANGER SERIES

Ski more! That is what we all want and the intention behind the new Ranger Series. The Ranger ski line is the result of 30 months of intense collaboration between team athletes, shop employees, ski engineers, and ski addicts with the aim of getting more out of every day spent on snow, regardless of conditions or the terrain. The Ranger line is made in Europe with as much recycled material as possible.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

CRAFTED TO **PLAY** MORE.

NIGHTSTICK

Designed and crafted specifically for park, slopestyle, and playful backcountry action, this innovative ski is incredibly durable and versatile, making it the best choice for those who shred hard and demand the best from their equipment. Developed and tested in collaboration with some of the best athletes in the world, the Nightstick already earned a World Championship silver medal and the Overall Freestyle World Cup title as well as the Overall World Cup titles in the disciplines Big Air and Slopestyle. Whether you're a seasoned pro or just starting out, the Nightstick will be your weapon of choice.

ALPINE / HIGHLIGHT

WELCOME TO THE NEXT LEVEL.

TRAVERS BOOT.

Introducing the next evolution of a real touring boot legend: the new Fischer Travers. As a pinnacle of innovation, the Travers builds upon the success of Fischer's renowned alpine touring boot, redefining performance for the adventurous souls conquering backcountry terrain. With a comprehensive redesign, this boot with a weight of only 1060g prioritizes lightweight construction and an array of upgraded components like the BOA® H4 Fit system or Vibram® soles for increased safety, comfort and downhill prowess. Unleash your potential with the Fischer Travers – where performance meets perfection, ascending to new heights with every step.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

CONSTRUCTION / CORES

AIR POWER

Ski core with less density. The reduced ski weight means easier handling and less energetic skiing.

SOLID WOODCORE

Wood core that retains the natural properties of the wood. This new ski core ensures stability and smooth running behavior.

SANDWICH SIDEWALL CONSTRUCTION

Wood core combined with ABS sidewalls in a classic Sandwich Construction for balanced flex and perfect rebound.

SIDEWALL CONSTRUCTION

Sidewall Construction to support the edges for highest stability, strength and durability.

ULTRA LIGHT WOODCORE

Ultra light woodcore used specially for touring skis to ensure minimum weight.

BEECH POPLAR WOODCORE

For optimum stability and optimal power transfer to the edge.

TECHNOLOGIES

DIAGOCARBON / FIBER

Innovative diagonal positioning of a carbon / glass fiber grid for excellent torsional stability with maximum power and stability in turns.

NOIZE CONTROL™

Noize Control™ is a unique print-technology out of the racing department. Applied metal pigments on defined spots of the surface makes the ski running more quiet, easier to control and improves the acceleration of the ski.

POWER TI

Titanium improved construction for a better edge grip.

CARBON TECH

Special network of carbon fibres with exceptional torsion properties and a balanced stiffness pattern at the same time.

FIBER TECH

Special glass fibre network with harmonious bending properties. The ski stands out through excellent turning action.

DIAGOWRAP

Wood core has a carbon fiber wrap for extremely high torsional stiffness with minimal weight.

RACE SIDEWALL

New manufacturing process alleviates the need for servicing the ski's sidewalls, making edge tuning much easier.

AIR TEC

On the one hand, the milled structure makes the core 25 % lighter and, on the other hand maintains the outstanding ski performance.

FLEX CUT

The Flex-Cut at the binding area optimized the flex of the ski according to the target group.

SHAPED TI

Matching the thickness and shape of this high-strength alloy to the performance targets and geometry of a ski allows optimal grip and stability with a smoother ride.

CARBON STRINGERS

Special Carbon Stringers ensure that weight is kept sensationally low with balanced flex and an optimized weight-torsion ratio.

ROCKER

The shorter contact length of the ski ensures that turn initiation is easier and requires less effort. Five different types: All Mountain ROCKER, Freeski ROCKER, Tour ROCKER, On Piste ROCKER, Hybrid ROCKER.

CARBON / FIBER BRIDGE

Extremely strong and light carbon fiber / fiberglass in the binding area oriented at 90° greatly enhances edge grip for high levels of smoothness and stability.

RADICAL TRIPLE RADIUS

This latest development of the Triple Radius shape enables an even easier turn initiation. Power transfer and control throughout the entire turn are also improved.

E-TRIPLE RADIUS

New triple radius which is perfect for carving and drift turns.

PLATES

ALLRIDE

Newest Powerrail variation for improved power transfer. Special features: tool-free adjustment, suitable for rental.

SLR PRO

New, two-part system solution with minimum weight. For perfect power transfer.

M-TRACK

A new type of plate construction that yields an optimal stance for a smooth, balanced flex, and more confidence and security at speed.

M/O-PLATE JUNIOR

Our new junior race plate guarantees high performance and efficient power transfer. The result is an ideal flex and maximum speed for smooth, aggressive turns.

TWIN POWERRAIL

New two-part Powerrail system with reduced weight and better power transfer.

SUPERFLEX

Superflex is a performance plate with Feelflex technology. The impact of plate and binding on the natural skiflex is minimized to give perfect edge hold and well balanced skiing performance.

M-PLATE

Newly developed plate from the World Cup, matched to the whole ski / plate / binding package.

JUNIOR RAIL SYSTEM

New, two-part system solution with the lowest possible weight. For an optimized power transmission for our juniors.

LYT PR

LYT PR is a Powerrail variation for improved power transfer. Special features: tool-free adjustment, suitable for rental.

BASE AND EDGE

WORLD CUP TUNING

Edges and base are given an extremely precise World Cup level finish on the most modern grinding line in the world.

WORLD CUP BASE

Original World Cup base with inserts to protect the ski from burning out through heat build-up.

SINTERED BASES

Sintered bases have exceptional waxing properties and a very long service life.

TECHNOLOGY

BINDINGS

FULL DIAGONAL TOE  <p>The 180° release reacts in almost all fall directions. Protects ligaments and tendons – particularly in the knee.</p>	DIAGONAL HEEL  <p>This binding heel has a release arc of 150°. Lower release pressure, particularly on forward twisting falls.</p>	FRP  <p>Four rollers and glide inserts optimise flexibility and release characteristics of the binding.</p>
FREEFLEX PRO  <p>Freely-suspended heel section permits unrestricted ski flexing for optimum ski control.</p>	AFS  <p>Weight-optimised adapter with which the new Anti Friction Slider ensures you have the usual safety. Better stability as a result - both horizontally and vertically.</p>	

TECHNOLOGY

RENT

RENTALTRACK  <p>Performance plate with full Rental features including Colour Code for fast adjustment and barcode field.</p>	ONE TOUCH  <p>Adjustable in a single movement of the hand – binding setting according to XTR Colour Size Concept. Practical when renting out skis.</p>	CERADUR  <p>Fibreglass material that protects the ski core like a shell. The result is a ski that is technically as new even after frequent use.</p>
ANTI CHIPPING  <p>Improved bonding of the top foil and laminate through a special rubber insert absorbs the forces exerted on the surface when skis are crossed. For a significant reduction of foil chipping.</p>		

PODIUM RACE BOOT TECH		
RACE CODE  <p>The RACE CODE label highlights products designed and tested by the Fischer racing department, guaranteeing the highest quality standard as demanded by World Cup racers.</p>	RD20 RACE CANTING  <p>The latest generation of race canting is designed to reduce the tolerance between cuff and shell of the boot, allowing for maximum power transfer and overall control. Available in 2 and 3 point asymmetrical versions to enable cuff alignment tuning. Please see Spare Part item: U78321 / U78322</p>	PHATT MAXX RACE  <p>55mm wide power strap for enhanced force transmission and pressure distribution. Outfitted with velcro backing supporting 1mm and 3mm shims to ensure the perfect hold across shell and liner tongue.</p>
RC4 LV / RC4 MV BOOT TECH		
SOMA-TEC®  <p>A natural slightly abducted (V-position) stance enables skiers to control their skis with absolute precision. Joint-friendly and effort-saving skiing is pre-programmed in the geometry of these boots.</p>	BOA® H+i1 FIT SYSTEM  <p>Dialed in. Locked in. Confident. This new high power and high strength BOA® system was developed specifically for use on alpine boots to promote shell wrapping and pressure distribution. Precision fit with on-the-fly tightening and loosening. Releasable cartridge and bayonet system prevents breakages through impact.</p>	FISCHER SCAN-FIT® LAST  <p>Next generation of last built leveraging hundreds of thousands of customer foot scans obtained through the FISCHER Scan-Fit® App. Guarantees an anatomic fit that provides increased power transfer and control.</p>
DOUBLE HOOK CATCHES  <p>The sleek cuff catch profile featuring a double hook ensures that the front-locking buckles stay in place when walking with cuff open. The entire system allows fixed cuff boots to be used for uphill travel without compromising the critical „to the front“ range of motion.</p>	D30®  <p>Fischer is the first ski boot brand to integrate the innovative D30® technology into the tongue of Vacuum Fit +Plus liners. The cutting-edge D30® material adapts to every movement, remaining flexible against the shin but stiffening up through the flex pattern, providing superior shock absorption and power transfer without compromising comfort.</p>	TECH INSERT TOE  <p>RC4 Free boots have a high quality touring insert integrated to the toe area only. The insert plus the GripWalk® soles, enable an unmatched binding compatibility, extending to Multi-norm (MN) bindings like the Attack-Hybrid, Shift, Duke PT, KingPin, and Cast System. If uphill travel is not on the agenda, no problem, the insert will not interfere with any standard alpine bindings.</p>
RC/RANGER HV BOOT TECH		
INTEGRATED SKI/WALK BUCKLE  <p>The ski/walk lever is integrated into the upper cuff buckle, enabling incredibly easy handling and assurance that it will not be switched unintentionally. Eliminates annoying fumbling on the back of the boot.</p>	FLOATING ENTRY FLAP  <p>The floating entry mechanism guarantees a very easy entry and exit to the boot at all conditions. It doesn't matter if the material is cold or if you have a high arch, the instep flap will slide out of the way.</p>	WOMEN'S SPECIFIC COLLAR  <p>Unique feature on all WS models which is intentionally cut lower and shaped for „typical“ female lower leg anatomy.</p>
TOUR BOOT TECH		
BOA® FIT SYSTEM - H4  <p>The new High-Power BOA® System - H4 was developed specifically for touring boots. It is characterized by the noticeably improved compression of the shell and the resulting optimal pressure distribution. Precise fit that can be consolidated at any time by fine adjustment function. Releasable cartridge and bayonet system prevents breakages through impact.</p>	BOA® M3 FIT SYSTEM  <p>Enables uncomplicated, fast and millimetre-precise setting and adjustment of the boot. Easy to use with just one hand for quick boot entry and exit.</p>	POWER BUCKLE SYSTEM  <p>Adjustable closing construction for a roomy fit on the uphills and a compact fit with impressive force transmission on the downhills.</p>
CARBON-SOLE INSERT  <p>A built in carbon/Aramid plate under the rubber sole maximizes torsional stiffness and direct power transfer to the ski. Inspires utmost confidence when traversing in steep or icy conditions.</p>	DOUBLE LOCK SKI/WALK  <p>A spring-loaded double locking mechanism ensures that the cuff and shell remain securely connected. The additional hook prevents unintentional opening of the system in all conditions.</p>	ADJUSTABLE FORWARD LEAN  <p>A flipable plate located between the cuff and the Double Lock Ski/Walk mechanism on all Transalp touring boots. Enables a quick adjustment of the forward lean inclination to either 16° or 13°.</p>
JUNIOR / KIDS BOOT TECH		
KIDS FRIENDLY  <p>Fischer ONE & TWO boots feature a highly-durable waterproof-gaiter that opens wide for easy entry. Zipper puller and velcro strap are simple to use, even with gloves!</p>	JUNIOR ALUMINUM BUCKLES  <p>Aluminum buckles developed specifically for junior ski boots to provide optimal closure and parent-free handling.</p>	JUNIOR ALUMINIUM MICRO-BUCKLES  <p>Micro-adjustable aluminum buckles for junior ski boots to allow precise adjustment of the closure and the best possible performance for the next generation of Fischer race athletes.</p>
RENTAL BOOT TECH		
RENTAL SIZE INFO  <p>Shell size and sole length information prominently displayed for fast and easy differentiation in the boot rack. Ideal for use in rental fleets.</p>	SANITIZED LINER TREATMENT  <p>Antibacterial treated inner lining stops odor and kills bacteria. Ideal for use in rental fleets.</p>	ADJUSTABLE CATCHES CUFF  <p>Regardless of a skier's calf volume, the cuff catches can be quickly and easily adjusted without tools to guarantee a perfect fit.</p>
SHELL & CUFF MATERIALS		
VACUUM  <p>Shells are moldable at 80°C through VACUUM process. Dynamic plastic that improves skiing experience, plus greater temperature stability and 15% less weight.</p>	TPU  <p>Thermoshape polyurethane (TPU) material is the benchmark and industry standard for top race products, as it offers superior ski boot suspension compared to polyamid or polypropylene mixtures. TPU rebound for a phenomenal ski experience due to the rebound and energy transfer characteristics. ZoneFit and Vacuum moldable at 120° C.</p>	CARBONFUSED  <p>TPU cuff reinforced with carbon fiber for increased stability and stiffer flex. The best-of-the-best for skiers who demand ultimate performance.</p>
PEBAX® RNEW  <p>Pebax® Rnew is a polyamide material produced largely with castor plant oil and is therefore renewable and sustainable. Great performance with a very low overall weight and high stiffness. Bootfitters are strongly advised to punch this material as it does not lend itself to grinding!</p>	GRILAMID®  <p>Use of Grilamid polyamide plastic in shells and cuffs results in lightweight boots with high stiffness. That makes the boot light for the uphill and give it a perfect performance for the downhill.</p>	PP  <p>PP (Polypropylene) is incredibly abrasion and heat resistant plastic material, that offers very good insulating and has a particularly high fatigue bending strength.</p>
BOOT SOLES		
GRIPWALK® ISO 23223  <p>The GripWalk® soles (ISO 23223) offer end users the ultimate in natural walking comfort, safety across slippery terrain, and ski performance. This is achieved through pronounced rounded shape and convex rib profile built with co-polymer rubber material. Adult and Children's norm soles are 100% compatible across all boots in the FISCHER range.</p>	VIBRAM® LITEBASE + TRACTION LUG  <p>Vibram® Litebase offers a drastic reduction in the thickness and weight of the rubber sole while maintaining the same performance. The thickness of the rubber base is reduced by 50% compared to conventional outdoor outsoles. When paired with the grip and traction enhancing properties of the Vibram® Traction Lug, there truly is no better sole option available.</p>	VIBRAM® TRACTION LUG  <p>Vibram® Traction Lug is an innovative sole design that focuses on the shape of the lugs. Developed with elite mountain athletes to enhance grip and traction up to 25% versus normal lugs. Integrated lugs in the depth of the profile guarantee maximum grip on any surface.</p>
FULL RUBBER SOLE ISO 9523  <p>The entire sole of the ski boot is made of durable rubber to give confidence inspiring grip even on the most technical climbs over rock and ice. Built to the established sole standard of ISO 9523, developed for touring boots with rockered rubber soles and no AFD (Anti-Friction Device) pad.</p>	ALPINE ISO 5355 SOLE PLATES  <p>Often called a „DIN“ or „Alpine“ sole, it is designed with a flat profile and hard plastic where it contacts the binding for better power transmission and smooth, consistent releases from alpine bindings. ISO 5355 soles will work in a wide variety of bindings including traditional alpine bindings, Multi-Norm (MN) bindings, and certain GripWalk bindings.</p>	SOLID SOLE ISO 5355  <p>These soles are similar in function to the ISO 5233 sole plates, except that are a fully-integrated part of the lower shell, making them not exchangeable. These soles are found on all Podium race boots. Please note that if boots are „lifted“ using the optional lifter plates, the toe and heel lugs must be routed/milled down to the correct height before skiing!</p>
