WE DON'T JUST KEEP UP, WE LEVEL UP.

We can always be more, it's the endless pursuit of the best, setting targets and put ourselves to the test.

From green runs to race runs and everything in between, the spirit of progression is present in all of us, as skiers and snowboarders, it's in our genes.

It's our obsession and our passion, and we dream of success, but when the confetti has settled, our heads will ask "what next?"

So, we question our methods, push our limits and challenge the status quo. We refine and strengthen, we experiment and evolve. Turn by turn we improve, we accelerate and we explore, together as a family. At HEAD, levelling up is more than a mindset, it's in our DNA.

WE CALL IT CHASING-BETTER

CHASING—BETTER

HEAD[®]

MORE THAN A MARKETING LINE

PERFORMANCE HAS ALWAYS BEEN AT THE CENTRE OF WHAT WE DO

Our mission is to bring high performance to every snow sports lover - from amateur to professional - to allow them to be the best they can be.

CHASING BETTER

R&D - PRODUCT MANAGEMENT

- Cutting edge performance
- Revolutionary since the beginning

- Quality
- Simplify manufacturing

MARCOM

- Brand experience
- Story-telling, real connections
- Community building, listening
- Creativity

SUSTAINABILITY

THINK, RETHINK, ACT.

At HEAD, we love and support sport. Our job is to enhance sporting performance and give encouragement to those who love sport too. However, as a company, it's not just about what we do, it's also about how we do it. It's never been more important to think about how we perform in terms of the environment. To do that, we need to rethink everything we do. We are now at the beginning of a crucial journey, where the ultimate destination is the maximum achievable sustainability in all our processes.

This journey will be a gradual series of real improvements. So this is the time to rethink every step so we can elevate our own performance game.

The stakes are high, but we're in this to win.

RETHINKING OUR STRATEGY ON CLIMATE ACTION

In 2007, HEAD partnered with the global environmental charity Cool Earth to kick off a worldwide environmental program - the first of its kind for a sporting goods company. Cool Earth aims to tackle the climate crisis in a cost-effective, mass membership approach enabling individuals and groups to directly fund rain forest protection on a massive scale and safeguard this invaluable resource. Cool Earth profoundly believes rain forests are worth much more left standing than cut down for timber or burnt to clear land for cattle ranching.

RETHINKING PACKAGING

We're working to not only reduce packaging in all areas but also to redesign it to eliminate plastic, replacing it with sustainable materials across all our groups.

RETHINKING PRODUCTS

In 2021 we released our first bag created using recycled rPET bottles. This project is being used as the basis for developing more products using recycled materials.

RETHINKING WHAT WE DO AT OUR LOCATIONS

All energy at our Headquarters in Kennelbach is supplied by an on-site hydro plant driven by the neighbouring Bregenzerach river. The Schindler GmbH & Co KG supply all commercial facilities on site with their own green electricity.

RETHINKING R&D

We continuously grow our business through our innovative use of technology. Our approach to sustainability is exactly the same. We are constantly researching new materials and production processes, working to create more sustainable products.

PERFORMANCE

HEAD2TOE

For the skier who demands high performance in every aspect. The highest levels of speed, manoeuvrability, comfort and safety. An exhilarating collection of sophisticated equipment that puts a smile on your face and your mind at ease no matter where your skis take you.

RACE PERFORMANCE

HEAD2TOE

Feel the aura of racing, this is your gateway to the world of speed. Awaken your inner Worldcup Rebel with the new collection of kick-ass, full-gas equipment. If you are on the hunt for pure speed and adrenaline-tinged skiing, look no further.

TOURING

HEAD2TOE

Away from the lifts and resorts, there are unknown treasures. For the pre-dawn raiders and the micro-adventurers, the new collection rewards backcountry explorers, whether you are hopping from hut to hut or just skinning up for a quick escape. Touring is back on the menu at HEAD, and boy does it feel good.

WOMEN'S

HEAD2TOE

Our women's collection features the same technology as our performance collection, tailored for strong female skiers. Each piece in the Head 2 Toe collection is designed to do one thing: smash on snow goals.

SKIS

Shape
TAKE IT
ALL IN

TRUST HEAD'S ALL NEW, EASY TURNING SHAPE SKIS TO HANDLE YOUR DAY WITH CONFIDENCE AND SMOOTH ANY SLOPE YOU MAY FIND YOURSELF ON. WHEN YOUR SKIS PRACTICALLY TURN THEMSELVES, YOU CAN CONCENTRATE ON KICKING BACK AND TAKING IT ALL IN.

Shape

TAKE IT ALL IN

Only when you have no worries, you can enjoy the experience. When the skis turn themselves, you can just take it all in. Everything about the Shape skis is designed to make skiing easier, you barely have to think and the skis have already initiated the next turn. Trust that your equipment can handle whatever you can.

FEATURES

NEW PR BASE

It is a two piece lightweight design, lower and perfectly integrated in the ski frame.

EMC

Energy Management Circuit in Shape e-V8 and Shape e-V10 skis. EMC front in the all new Shape e.V5.

DESIGN

Updated Tip and Tail design based on a proven sidecut with ERA 3.0.

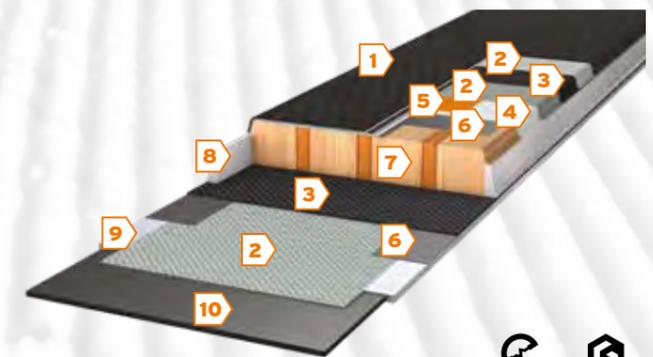

PERFORMANCE BACKBONE

Adapted 3D-Design on whole range for improved weight and ski thickness. LYT Tech continues - Light done right.

SUPERLITE CARBON SANDWICH CAP CONSTRUCTION

- 1 Top Sheet
- 2 Glass Fiber
- 3 Carbon
- 4 Diagonal Glass Fiber
- 5 Graphene
- 6 Dampening Layer
- 7 Wood Core Karuba-Ash
- 8 Sidewall
- 9 Edge
- 10 Base

KORE TOUR

LESS IS TOUR

BUILDING ON THE SOPHISTICATED KORE RANGE OF FREERIDE EQUIPMENT, THE SUPERLIGHT, FEATURE-PACKED KORE TOUR LINE ANNOUNCES HEAD'S RETURN TO THE SKIN TRACK. EXPLORE FURTHER INTO THE BACKCOUNTRY WITH EASE, WHETHER SKINNING UP OR CHARGING DOWN.

HEAD

KORE TOUR

TOURING IS BACK AT HEAD

With a new super lightweight construction and unnecessary weight removed in the tip and tail area, riders are able to explore further, heading away from the resort and finding lines that lift reliant riders can only dream of. And after you have flown up to the top, the ski still rips like a KORE on the way down, lightweight and mighty.

FEATURES

SKIN NOTCH

Milled out notch to fix skins properly.

BACKCOUNTRY BINDING

Great set-option with Ambition bindings.

CUSTOM SKINS

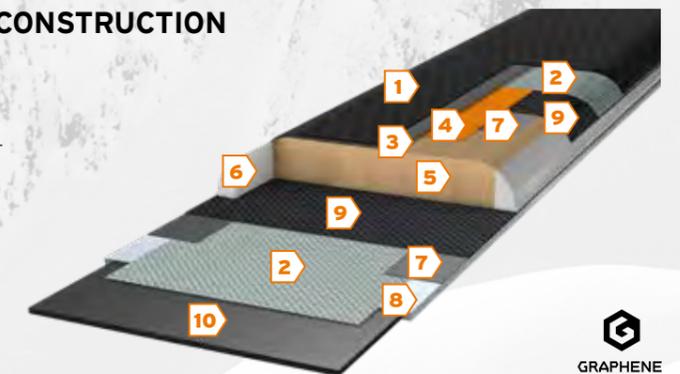

To complete the touring package HEAD have created custom pre-cut skins in partnership with Pomoca, including a storage bag too.

TOPLESS TECH

Removing the top sheet keeps the weight down and adds a unique colour finish.

KORE

THE PUREST KORE YET

Through athlete input and listening to the needs of the everyday skier we have removed the unnecessary and added performance elements that help more skiers achieve their goals. Whatever their level, whatever the terrain.

FEATURES

1 COLLECTION, 2 PERSONALITIES

Tailored constructions give wider models a more playful, surfy feel, and narrower skis more stiffness and precision.

PROGRESSIVE CHAMFER

A crud-cutting chamfered top edge improves durability and gives a more playful feel.

EXTRA CARBON LAYER

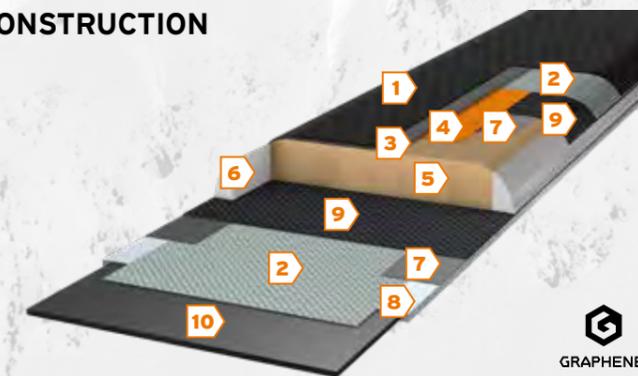

Adding another layer of carbon to the construction saves weight and ensures the ski performs consistently.

TWO-FACE SIDEWALLS

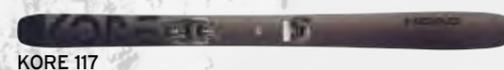

Different sidewall colors on each side for an eye catching look.

MULTILAYER CARBON SANDWICH CAP CONSTRUCTION

- 1 Top Sheet

OBLIVION

LIMITLESS PROGRESSION

The days of binary skiing are over. Let's go park and backcountry. Let's go freestyle and freeride. Let's go where we want, when we want, how we want. And let's throw the old limits to OBLIVION.

FEATURES

LESS VIBRATIONS

Elastomeric vibration killers (Independent Suspension System) located in the tip, tail and underfoot.

WOOD CORE

The Wood Core Sandwich Construction adds stability to charge hard or land softly.

REINFORCED MATERIALS

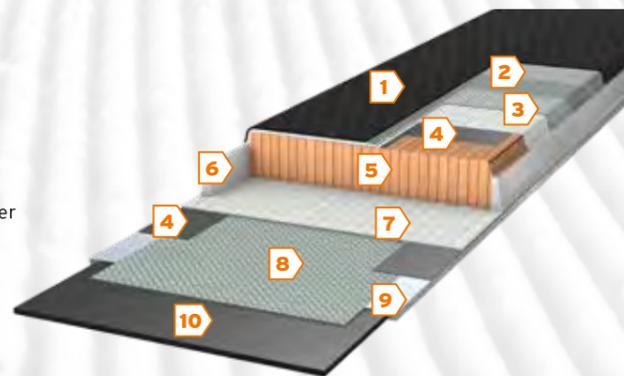

Impact resistant ABS sidewalls. The additional use of thicker edges and running bases ensure that these models can truly be described as bullet proof.

SCRATCH RESISTANT TOPSHEET

A scratch-resistance topsheet for more durability.

SANDWICH TWINTIP CONSTRUCTION

- 1 Top Sheet
- 2 Glass Fiber Fleece
- 3 Glass Fiber
- 4 Dampening Layer
- 5 Wood Core
- 6 Sidewall
- 7 Diagonal Glass Fiber
- 8 Reinforced Glass Fiber
- 9 Edge
- 10 Base

KORE X

ALL MOUNTAIN, FULL CONFIDENCE

Whether arcing a turn or cruising the slopes, this is the ski that gives the confidence to own it all. The younger sibling to our cutting edge KORE freeride skis, the KORE X range helps you make your first turns away from the slopes. In resort, or away from the pistes, ski with confidence with KORE X.

FEATURES

SANDWICH CAP CONSTRUCTION

Easy skiability due to the superlite sandwich cap construction.

LYT POWER RAIL BASE

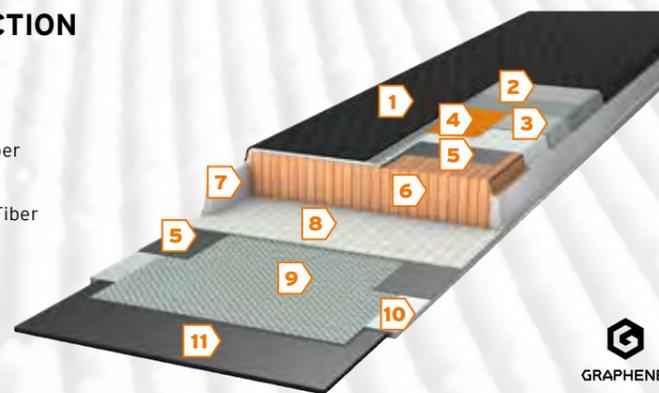

For set option with new Protector binding.

DURABLE TOPSHEET

Topsheet with awesome matt weave structure for high durability.

JOY

REALISE YOUR
INNER AMBITIONS

WHATEVER YOUR GOAL, THERE IS A JOY SKI TO HELP YOU ACHIEVE IT. TAKE ON EVERYTHING FROM GREEN RUNS TO BLACK RUNS, WHATEVER THE WEATHER, THESE ARE STRONG SKIS FOR STRONG FEMALE SKIERS.

HEAD®

JOY

REALISE YOUR INNER AMBITIONS

With technology and performance straight from a race pedigree, introducing the new women's ski line Joy. Each ski in the range has been individually designed for maximum versatility, meeting a range of abilities from beginner to the expert, both on and off-piste terrain.

FEATURES

PROTECTIVE FRAME STRUCTURE

Structured low angle sides to improve durability.

LIGHTWEIGHT WOODCORE

Lightweight Karuba Wood and embedded Graphene increases performance while keeping it light.

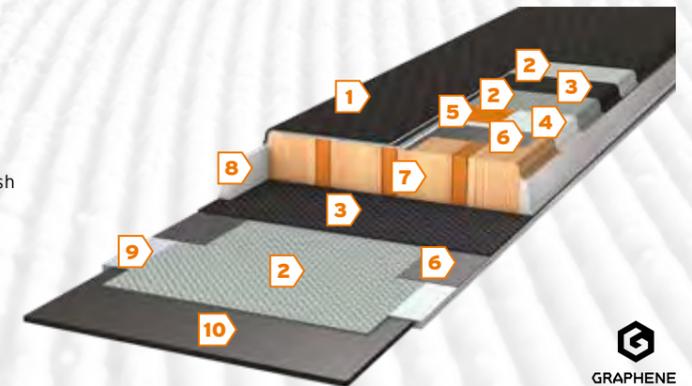

FEMALE CAMBER

For great acceleration and excellent edge grip.

E4SY KIDS SYSTEM

LESS EFFORT, MORE FUN

The new Junior Rail System makes skiing super easy thanks to the low weight and the smoother flex. The new shape of the sole lug and softer brakes allow the kids to step in and out of the binding within seconds and without any help. Compatibility with all ski boot types (A/C/GW A/GW C) completes the new system.

FEATURES

HANDLING

Heel can be adjusted in open position

FLEX

Locking elements & adjustment levers made from synthetic material

FLEX

Easier to bend

STEP IN

New shape of the sole lug - easier to position the ski boot correctly in the binding

WEIGHT

15% weight reduction ski + binding

Softer brake - less resistance when stepping down (entry force -15%)

THE NEW STANDARD FOR KIDS' SKIING EQUIPMENT

Start them early, and start them often. With a high quality construction, kids will learn faster and ski longer than ever before. The Supershape Team is an on-piste ski for children who can already ski. It delivers good stability and helps the kids race up the learning curve.

WORLD CUP E.RACE TEAM JRS

With a full wood core and sidewalls, young speedsters will be stable and quick as they race all over the mountain.

MONSTER

AGE ADAPTED DESIGN

As children grow and develop, their ability to appreciate various design changes. Therefore we have designed each length of the Monster line to best fit that age group's typical developmental phase.

The new Junior Rail System makes skiing super easy thanks to the low weight and the smoother flex.

SKI DESIGN THAT GROWS WITH THE SKIERS

The first skis are packed with primary colours but as the skier progresses and evolves so does the ski, becoming more refined, a look that is too cool for school.

JUNIOR

MONSTER EASY JRS

The Monster Easy JRS makes skiing friendly and fun.

SKI CONSTRUCTIONS

GRAPHENE CORES

SUPERLITE CARBON SANDWICH CAP CONSTRUCTION

By combining the lightest and strongest materials, we have been able to develop a more stable, robust and lightweight ski. Utilizing karuba wood, carbon, and Graphene materials guarantees optimal performance with the lightest possible weight. The Superlite Carbon Sandwich Cap Construction guarantees the ultimate skiing pleasure.

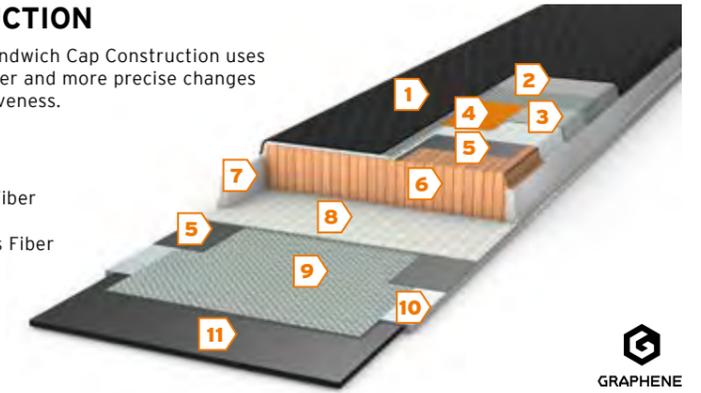

- | | |
|------------------------|------------------------|
| 1 Top Sheet | 6 Dampening Layer |
| 2 Glass Fiber | 7 Wood Core Karuba-Ash |
| 3 Carbon | 8 Sidewall |
| 4 Diagonal Glass Fiber | 9 Edge |
| 5 Graphene | 10 Base |

SUPERLITE SANDWICH CAP CONSTRUCTION

Thanks to the unique properties of Graphene, the Superlite Sandwich Cap Construction uses fewer materials but increases its responsiveness, allowing faster and more precise changes from edge-to-edge. The ultimate ski for flotation and responsiveness.

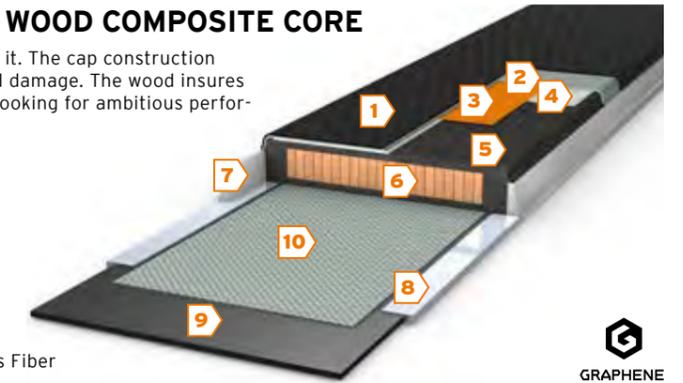

- | | |
|----------------------|--------------------------|
| 1 Top Sheet | 7 Sidewall |
| 2 Glass Fiber Fleece | 8 Diagonal Glass Fiber |
| 3 Glass Fiber | 9 Reinforced Glass Fiber |
| 4 Graphene | 10 Edge |
| 5 Dampening Layer | 11 Base |
| 6 Wood Core | |

SUPERLITE POWER SIDEWALL JACKET WOOD COMPOSITE CORE

A vertically laminated wood core with a PU injected sock around it. The cap construction with ABS Sidewalls insures complete protection from mechanical damage. The wood insures stability against vibrations and a smooth ride for target groups looking for ambitious performance.

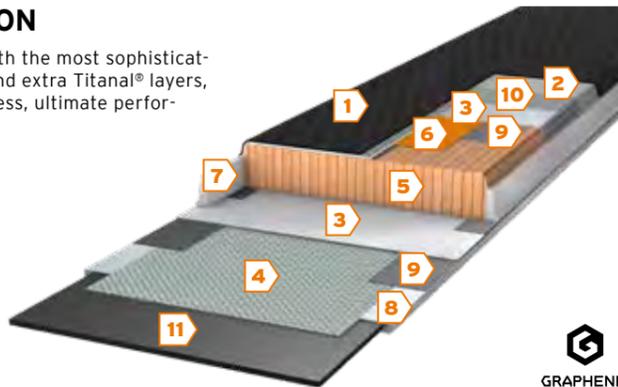

- | | |
|------------------------|---------------------------|
| 1 Top Sheet | 6 Wood Core |
| 2 Glass Fiber | 7 Sidewall |
| 3 Graphene | 8 Edge |
| 4 Diagonal Glass Fiber | 9 Base |
| 5 Synthetic Core | 10 Reinforced Glass Fiber |

WORLD CUP SANDWICH CAP CONSTRUCTION

The Graphene Worldcup Sandwich Cap Construction, is developed with the most sophisticated materials known to man. With a balanced mix of light Graphene and extra Titanal® layers, the ski combines the most extreme agility with extreme responsiveness, ultimate performance.

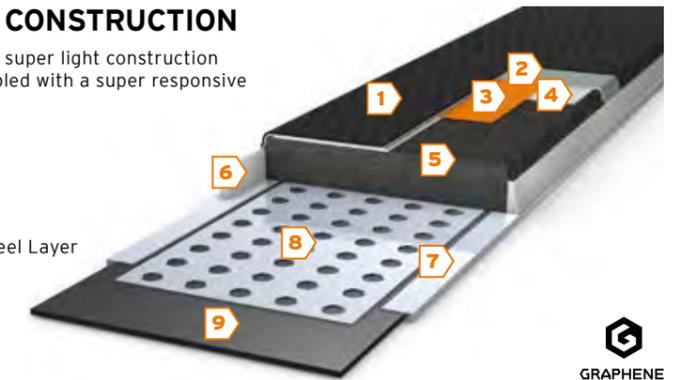

- | | |
|----------------------|---------------------------|
| 1 Top Sheet | 7 Sidewall |
| 2 Glass Fiber Fleece | 8 Edge |
| 3 Titanal® Layer | 9 Dampening Layer |
| 4 Glass Fiber | 10 Reinforced Glass Fiber |
| 5 Wood Core | 11 Base |
| 6 Graphene | |

SUPERLITE POWER SIDEWALL JACKET CONSTRUCTION

A synthetic injected core supported with ABS sidewalls. This is a super light construction thanks to Graphene which allows for a soft longitudinal flex coupled with a super responsive torsional flex, thanks to the sidewall jacket.

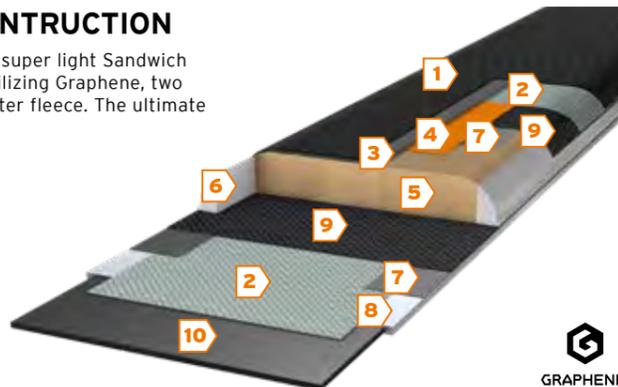

- | | |
|------------------------|---------------------------|
| 1 Top Sheet | 6 Sidewall |
| 2 Glass Fiber | 7 Edge |
| 3 Graphene | 8 Performance Steel Layer |
| 4 Diagonal Glass Fiber | 9 Base |
| 5 Synthetic Core | |

MULTILAYER CARBON SANDWICH CAP CONSTRUCTION

Developed from the most sophisticated materials known to man: the super light Sandwich Construction makes up one of the world's lightest freeride skis by utilizing Graphene, two different carbon layers, as well as replacing the surface with a polyester fleece. The ultimate construction for a high performing freeride ski.

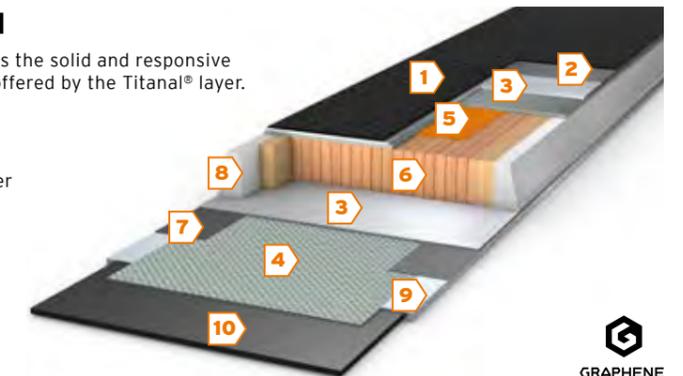

- | | |
|---------------------------|-------------------|
| 1 Top Sheet | 6 Sidewall |
| 2 Glass Fiber | 7 Dampening Layer |
| 3 Glass Fiber bk | 8 Edge |
| 4 Graphene | 9 Carbon |
| 5 Karuba-Poplar Wood Core | 10 Base |

WORLD CUP SANDWICH CONSTRUCTION

A wood core sandwich construction with Titanal® which combines the solid and responsive performance of the vertically laminated wood core and control offered by the Titanal® layer.

- | | |
|----------------------|-------------------|
| 1 Top Sheet | 6 Wood Core |
| 2 Glass Fiber Fleece | 7 Dampening Layer |
| 3 Titanal® Layer | 8 Sidewall |
| 4 Glass Fiber | 9 Edge |
| 5 Graphene | 10 Base |

BINDINGS

PROTECTOR

RECOMMENDED BY YOUR KNEES

Thanks to its FULL HEEL RELEASE (FHR), vertical & lateral, the new PROTECTOR binding can reduce ACL strain by more than 50%*. This will lead to a significant reduction and mitigation of knee injuries.

FHR - KEY FACTS

Conventional bindings offer only vertical release at the heel.

Conventional bindings are designed to reduce the risk of injuries to the lower leg below the knee, but they are not intended for preventing injuries to the knee.

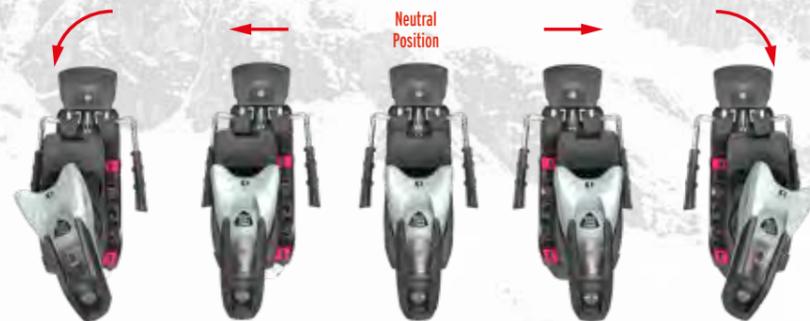

PROTECTOR bindings offer FULL HEEL RELEASE (FHR) - releasing 180° (laterally and vertically).

PROTECTOR BINDINGS ARE DIFFERENT

thanks to its FULL HEEL RELEASE they can reduce the risk of injuries for both the knee and the lower leg. The reduced release values in forward and especially in backward twisting falls assure less stress for your knees and safer skiing.

FHR - HOW DOES IT WORK

- 7 mm bi-lateral movement.
Benefit: This elasticity absorbs all impacts on the binding and avoids pre-releases.

- Then 30° rotation - the rotation is only initiated when the loads are too high and the ski boot is released.

* finite element model simulations by University of Innsbruck: "Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls"

PERFORMANCE

PROTECTOR PR 13 GW

The all-new Protector PR 13 binding with Full Heel Release (FHR) technology offers maximum safety in forward and backward twisting falls by reducing release values, therefore assuring less stress for your knees and safer skiing.

SAFETY FEATURES

ONLY PERFECTION PROVIDES SAFETY

A special dedication to Active Safety is a core value at HEAD. Continued advances in research and development, unparalleled performance and high-quality service guarantee a high-tech product renowned throughout the entire winter sports industry.

FHR - FULL HEEL RELEASE

The TYROLIA Full Heel Release function delivers intelligent 180° release both laterally and vertically ensuring maximum safety in forward and backward twisting fall situations. The FHR function can reduce ACL strain by more than 50%*

AFS - ANTI-FRICTION SLIDER

The TYROLIA Anti-Friction Slider (AFS) provides not only secure boot release but also rapid and exact boot re-centering. For better safety and reliability.

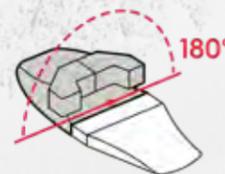

DIAGONAL® RX-HEEL - D-RX HEEL

With a 150° release range, the Diagonal Heel releases directly into the direction of the fall and reduces pressure on knees and ligaments in forward twisting fall situations.

TRP- TOE SYSTEM

The TYROLIA Roller Pincer Toe System (TRP system) with its four rollers allows a 180° release and exact centering of the ski boot. The TRP system reduces the load on knees and ligaments and improves performance considerably.

FULL DIAGONAL TOE- RX TOE

The Full Diagonal Toe features more than improved aerodynamics. The TYROLIA Full Diagonal Release function delivers intelligent 180° release both horizontally and vertically.

HEAD/TYROLIA is an official GripWalk partner. The entire HEAD/TYROLIA binding line for adults and children is GripWalk compatible. The bindings can be used with Alpine ski boots (ISO 5355) plus GripWalk ski boots (ISO 23223).

* finite element model simulations by University of Innsbruck: "Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls"

ATTACK 17 GW

Compact, rugged and reliable, the Attack 17 GW binding is the binding of choice for pro-level freeskiers. The binding is supremely versatile and ready for the use in any terrain.

JUNIOR RAIL SYSTEM

LESS EFFORT, MORE FUN

In the Junior segment HEAD offers a system (JRS) that is perfectly tailored to the special needs of kids. This system offers easy handling, easy weight, easy flex and easy step in & out of the binding to ensure more fun on the slopes.

1 LIGHTWEIGHT
15% weight reduction

4 SMOOTHER FLEX
locking elements and adjustment lever made from synthetic material

2 WORKING WITH ALL SOLE TYPES
without any adjustments (A/C/GW A/GW C)

5 STEP IN + OUT IN SECONDS WITHOUT HELP
the innovative shape of the sole lug ensures an exact positioning of the ski boot in the binding. The softer ski brakes, with 15 % less entry force, allow the kids to step in and out easily and independently

3 BASED ON A RAIL SYSTEM
binding is mounted and ready to go in seconds

6 EASY TO ADJUST
heel can be adjusted in open and closed position

JOY 7.5 GW CA BRAKE 78 [H]

JRS 4.5 GW CA BRAKE 80 [I]

JRS 7.5 GW CA

The JRS 7.5 GW CA guarantees maximum fun. The binding system delivers a host of benefits: light weight, easy step-in and step-out and compatibility with all ski boot types (A/C/GW A/GW C).

BOOT-BINDING COMPATIBILITY

In season 2022/23 all our HEAD bindings will have a specific marking on the toe (printed letter/symbol or in the mould of the AFD) to show the boot compatibility.

MARKING ON THE PRODUCT:

A	A	A	A	CA	A

COMPATIBLE BOOT STANDARDS:

Alpine Adult sole (ISO 5355 - TYPE A)	Alpine Adult sole (ISO 5355 - TYPE A)	Alpine Adult sole (ISO 5355 - TYPE A)	Alpine Adult sole (ISO 5355 - TYPE A)	Alpine Adult sole (ISO 5355 - TYPE A)	Alpine Adult sole (ISO 5355 - TYPE A)
	Walk Adult sole (ISO 23223 - TYPE A)	Walk Adult sole (ISO 23223 - TYPE A)	Walk Adult sole (ISO 23223 - TYPE A)	Walk Adult sole (ISO 23223 - TYPE A)	Walk Adult sole (ISO 23223 - TYPE A)
				Alpine Children sole (ISO 5355 - TYPE C)	
				Walk Children sole (ISO 23223 - TYPE C)	
			Touring sole (ISO 9523)**		Touring sole (ISO 9523)**

BINDING STANDARD:

ISO 9462	ISO 9462	ISO 9462	ISO 9462	ISO 9462	ISO 9462
			ISO 13992		ISO 13992

* screwdriver icon indicates that the toe height needs to be adjusted by the technician

** Although there is no Type A & C standard in ISO 9523 - MN bindings are marked with A to avoid possibly installing of a Type C Alpine or Walk boot in those bindings

**LIGHTER
COMFIER

FIT DONE RIGHT

The most versatile, comfortable, and top-performing boot fit system we've ever sold. 100% Flexible. 100% Comfort. 100% Performance.

FAST AND EASY CUSTOMIZATION

The Liquid Fit material provides the most precise and the quickest customization. The material's density ensures the perfect mold in the most critical area of the boot, the ankle and heel pocket. The performance and precision of a foam injection liner in 10 easy, comfortable minutes.

100% FLEXIBLE: If necessary, you can add or remove material any time.

100% COMFORTABLE: The incompressible material provides the most comfortable customization possible.

100% PERFORMANCE: Thanks to superior heel retention.

PERFECT FIT 3D

Perfect fit is the revolutionary customization system that ensures comfort and performance in HEAD's superb skiboots. The 3D pre-shaped construction provides optimal adaption to the foot shape while ensuring maximum comfort.

FORM FIT

The formfit plastics formulas hold stretches better than ever before for a perfect fit with improved balance and control.

KORE

FRONTSIDE OR BACKSIDE, THERE IS NO DOWNSIDE.

FROM THE SOLE UP, THE ALL NEW KORE RS BOOT OZES ALL MOUNTAIN DOMINANCE. A HARD CHARGING, LIGHTWEIGHT GRAPHENE CONSTRUCTION COUPLED WITH BACKCOUNTRY CAPABILITIES TO PROPEL YOU FURTHER, HIGHER, STEEPER AND DEEPER.

HEAD®

KORE

TEAR IT UP, ALL OVER THE MOUNTAIN

At home in the backcountry and in resort, the new KORE RS boot borrows technologies from HEAD's legendary racing performance range, giving you excellent power transfer and responsiveness in a backcountry friendly package. Available in two lasts: 98mm and 100mm, to suit all feet and all terrain.

FEATURES

BUCKLE LOCK

Lock the buckle in a open position for an easy hike.

SUPERLEGGERA BUCKLES

The new light buckles: 90% aluminum, simple, effective and reliable.

NEW SKI-HIKE MECHANISM

Forward lean adj. +1°. 53° Range of motion: provides strong, precise connection between cuff and shell.

NEW LAST AND GEOMETRY

Derived from new Formula and Raptor boots.

KORE PRO LIGHT LINER

Reinforced upper cuff, tongue Velcro for extra spoiler, increased heel retention. ATTENTION: The liner should be customized before skiing.

RATCHET VELCRO

The new light velcro, offers high performance, quick and efficient closure.

RATCHET LOCK

Lock the buckle's bail in place for a secure fit while ascending.

RUBBER INSERT

For enhanced grip when hiking.

LOW TECH INSERT

Dynafit certified.

WORLD CUP PERFORMANCE MEETS WORLD CLASS FIT

WHETHER ON A RACE COURSE OR WHEN FITTING BOOTS, MILLIMETRES MATTER. HEAD'S PRECISELY CONSTRUCTED RAPTOR WCR BOOTS NOT ONLY CONQUER ANY TYPE OF FOOT, WITH LIQUID FIT, THEY EVEN COMFORT THE TRICKIEST OF FEET.

HEAD®

RAPTOR

THE PINNACLE OF PERFORMANCE AND PRECISION

Dominate the race course with the legendary Raptor, the most successful boot in the World Cup and the equipment of choice for the worlds fastest racers. Thanks to HEAD fitting technologies, ultimate speed can be achieved with a tailored, precise fit.

FEATURES

CUFF ALIGNMENT

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

BUCKLE POSITIONING

The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

EXTENDED TOE BOX AND MATERIAL

The longer toe box has been designed to reduce torsion and increase power transmission. Combined with new PU material, provide a more progressive flex, smooth rebound and less vibration for better control.

RACE BALANCE

Ramp angle: 4°
Forward lean (new): 9°
Forward lean (classic): 16°

WCR BOOT BOARD

The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

LIQUID FIT

Precise heel and ankle retention for higher level of performance.

ADJUSTABLE TONGUE

Position the tongue for a perfect personalized fit.

GOOD
BOOT

FORMULA

**HARD CHARGING + EASY FITTING
= A DA*N GOOD BOOT**

WE TOOK THE HIGH OCTANE PERFORMANCE OF HEAD'S WORLD CLASS RACING BOOTS AND COMBINED IT WITH A HIGHLY CUSTOMIZABLE FIT. IT'S THE WINNING FORMULA FOR YOUR PERFECT DAY.

HEAD

FORMULA

FORMULA DERIVED FROM RAPTOR WCR

Exceptional ski control and precision for expert skiers together with unbeatable comfort and foot wrapping. Available in two lasts: 98mm and 100mm, to suit all feet and all terrain.

FEATURES

CUFF ALIGNMENT

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

LIQUID FIT

Customizable for secure ankle hold precise fit.

PERFECT FIT 3D

The 3D pre-shaped construction provides optimal adaption to the foot shape while ensuring maximum comfort.

SPINEFLEX BUCKLE

Unique buckle concept with a flexible element and constant closure point.

EXTENDED TOE BOX

The longer toe box has been designed to reduce torsion and increase power transmission. The new design allows for better balance, increased comfort and warmth for the skiers toes.

PU MATERIAL

The PU material, which derives from the experience with the Raptor WCR, provide a more progressive flex, smooth rebound and less vibration for better control.

LYT TECH

WHY LYT TECH WILL SET YOU FREE

You simply begin a process of taking away what is not needed and refining what is left. When you take away weight and complexity you free yourself to do something remarkable. You've distilled something down to it's purest form. LYT Tech is the technology that makes sure nothing comes between you and superb performance.

WHAT IS LYT TECH?

LYT Tech is a new, modern design concept. The first boots featuring Graphene and Smart Frame Shell design. Optimizing the performance of thin, lightweight shells.

SMART FRAME SHELL

The lightweight shell construction is designed for more dynamic responsiveness, improving the performance for the all mountain skier.

GRAPHENE

The Graphene infused plastic combines with the Smart Frame shell for the perfect balance of performance and comfort in a lightweight boot.

NEXO LYT

POWER EFFICIENT DESIGN

Better skiing with less effort. Graphene and Smart Frame Shell combine to give an unrivalled skiing experience that is as powerful as it is lightweight. Easy Entry design and pliable materials make this one of our most accessible boots to date. But, make no mistake, this is a high-performance boot that will satisfy the most advanced skier.

The Nexo LYT is built for skiers who love to cruise, carve and charge all day long.

LIQUID FIT LINER

The revolutionary system that ensures comfortable, performance-orientated customization

SUPERLEGGERA BUCKLES

The new light buckles: 90% aluminum, simple, effective and reliable.

DUO FLEX

Enables a progressive and reactive flex with precise ski control through all phases of the turn.

POWER PLATE AND 50MM VELCRO STRAP

Designed to increase support through the upper cuff, elevating overall performance.

EASY ENTRY DESIGN

Bi-injected shell with softer material for easier step in performance

EVO STANCE

Forward lean 14°, ramp angle 4°.

EDGE LYT

BETTER SKIING WITH LESS EFFORT

Experience control and comfort in a lightweight boot with a 102mm last.

FEATURES

SMART FRAME

The new lightweight shell construction is specifically designed for a more dynamic rebound that greatly improves performance for the all mountain skiers.

GRAPHENE

The new Graphene infused plastic combined with the new Smart Frame shell delivers the perfect balance of performance, comfort and lightweight design.

HI-TOP TECH

Direct contact between the boot tongue and shell delivers supreme support for more confident skiing.

DUOFLEX

The DuoFlex enables excellent balance and control in all positions of every turn.

RAPTOR JUNIOR

SHORT CUFF DESIGN FOR JUNIOR RACER

CUFF ALIGNMENT

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

BUCKLE POSITIONING

The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

EXTENDED TOE BOX AND MATERIAL

The longer toe box has been designed to reduce torsion and increase power transmission. Combined with new PU material, provide a more progressive flex, smooth rebound and less vibration for better control.

RACE BALANCE

Ramp angle: 4°
Forward lean (new): 9°
Forward lean (classic): 16°

WCR BOOT BOARD

The WCR boot board has no varus, which allows for rapid and easy fitting.

Z KIDS BOOTS

SKI NATURALLY, LEARN FAST!

GEOMETRY

Jr. Hi-Top - Higher tongue profile and asymmetrical lateral support.

TWO PHASE FLEX

Gradual and natural centered balance.

NATURAL KID STANCE

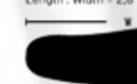

VARIO LAST DESIGN

HEAD's Anatomical last has been developed to accommodate the natural growth of kid's feet: Wider last on small sizes.

Size 15
Length : Width = 2,2

Size 26
Length : Width = 2,8

HELMETS

HEAD[®]
.COM

HELMET LINE

Not everybody who wears a helmet feels the need to race down a slope with 140 km/h, or to drop a 20 meter cliff - like our athletes do. Our range is designed to meet the requirements of professional athletes as well as the demands of a relaxed day on the slopes. From skiing to snowboarding, from big mountain to all mountain, from professional to beginner - we got you covered!

RACE

Developed together with and trusted by many of the world's best alpine racers - the Worldcup Rebels. This helmet line caters to the specific demands of competitive racing - strong, durable, aerodynamic and incredibly safe. WE MAKE THE EQUIPMENT. YOU MAKE HISTORY.

KEY FACTS

- > lightweight products
- > aerodynamic design
- > for all alpine race disciplines

RADAR & RACHEL

Award-winning helmet with a fully integrated visor that combines the benefits of wearing a goggle with that of having a visor helmet. Lenses can be exchanged in seconds and are available in several configurations, including our new contrast-enhancing 5K Lens Technology.

KEY FACTS

- > revolutionary design
- > Integrated Visor System
- > patented Sphere Fit system with BOA®

NEW

- > MIPS version available
- > multiple design options

REV & RITA

Innovative helmet line, which sets a new standard in comfort, ventilation and fit. All models feature the patented Sphere Fit system with BOA®, as well as an Adjustable Ventilation - making this platform perfect for on- and off-piste.

KEY FACTS

- > revolutionary design
- > Adjustable Ventilation
- > patented Sphere Fit system with BOA®

NEW

- > multiple design options

KNIGHT & QUEEN

These sporty, all-conditions visor helmets allow a winter sports enthusiast to do away with goggles and wear prescription glasses if needed. Superlative venting, a customizable fit, and plenty of warmth and comfort characterize these visors. Lenses can be exchanged to adapt to changing weather conditions.

KEY FACTS

- > lightweight In-Mold construction
- > toolfree visor exchange
- > spare visors available in multiple lens option

COMPACT PRO & COMPACT

The new COMPACT helmet line is focusing on the essentials of a winter sports helmet: great look, perfect fit, and - most importantly - supreme protection. A perfect fit is guaranteed thanks to our patented Sphere Fit system.

KEY FACTS

- > highly durable
- > slim profile
- > patented Sphere Fit system

NEW

- > MIPS version available

V-SERIES

The V-SERIES is all about maximum safety and a perfect helmet climate. The ventilation system uses the Venturi Effect, creating the perfect, fog-free climate for both helmets and goggles. The lightweight construction together with a comfortable lining will let you forget you are wearing a helmet.

KEY FACTS

- > lightweight In-Mold construction
- > supreme ventilation with Venturi Effect
- > comfortable interior

JUNIOR

Our junior helmets are packed with the features, style, and protection of HEAD's adult line, optimized for small heads. A fit system, together with a soft lining and Removable Earpads provide supreme comfort and added wearability for growing kids. The Thermal Ventilation gives kids a comfortable, more confident experience so that staying safe on the hill becomes instinctive.

KEY FACTS

- > kid specific sizes
- > lightweight and durable construction
- > visor options available

NEW

- > matt finish
- > new visor options with mirror coating
- > packages with goggles available

PERFECT MATCH

Everybody has an individual demand in terms of product, performance and fit - a perfectly matching helmet and goggle combination is essential to maximize safety, function and style on slopes. Here is our guide to your perfect combo.

R-SERIES & MAGNIFY

This is the lighthouse combo in terms of function and bold design. The MAGNIFY perfectly integrates in the shape of the R-SERIES helmet line while also combining the ventilation system of both items.

R-SERIES & CONTEX

A very modern product combination, offering a supreme field of vision and supreme ventilation properties. Two available sizes of the CONTEX make it easier than ever to find your individual perfect match.

COMPACT & CONTEX

Both the COMPACT helmet platform and the CONTEX goggle platform were developed together, to assure perfect integration and unrestricted field of vision. All models of those platforms match each other perfectly, further supported by multiple sizes that can be chosen from.

COMPACT & F-LYT

A very lightweight and affordable product combination, which does not need to hide itself in terms of look and functionality. Both items are offered in different sizes, assuring a slim and integrated look for all demands.

V-SERIES & HORIZON 2.0

Two evergreens and bestsellers in our product line, which make for a perfect match. The reduced, modern design of both items offers a timeless look for all areas of use.

V-SERIES & F-LYT

The lightest combination in our line, for situations where every gram matters. Multiple sizes are available for both helmet and goggle to achieve a 100% product integration and optimized closing against wind, water and snow.

TAYLOR & STREAM

A great junior package, with extraordinary durability. The protective goggle frame integrates perfectly in the helmet and limits the exposure to external hazards.

MOJO & NINJA

The recommended combo for the smallest on the slopes. Lightweight, functional and easy to use make this product combination perfect for aspiring youngsters.

DOWNFORCE

GO FAST. AGAIN TOMORROW.

This is the new benchmark in helmet design. A strong, durable shell in a streamlined, aerodynamic shape that's also extremely light and incredibly safe. It has a speed mode with acoustic adapters and a gate mode where the adapters can be exchanged for a chin guard for slalom disciplines.

1 MODULAR DESIGN

Use the flat adapter plates with optimized acoustics for speed disciplines, the chin guard adapter for slalom disciplines. Both adapter plates are included in the box.

2 OPTIMIZED AERODYNAMICS

The outline of the DOWNFORCE is designed to limit air drag to the minimum. The spoiler at the back of the helmet diffuses the air stream and therefore adds to the aerodynamics.

3 SUPER LIGHTWEIGHT

Using lightweight components and Dual Density technology, the DOWNFORCE is amongst the lightest racing helmets in the market.

4 HIGHEST SAFETY LEVEL

All DOWNFORCE helmets fulfill the highest safety standards and comply to the EN 1077:2007 Class A, ASTM 2040 and FIS RH 2013 standard. In addition, the MIPS Brain Protection System is available for certain models.

PERFECT RACE UNIT

Developed together with our athletes, the DOWNFORCE helmet line is designed to perfectly integrate race specific goggles.

DOWNFORCE & SENTINEL

A big, bold and aerodynamic race combo. Developed together, the DOWNFORCE helmet curvature is optimized to intake the SENTINEL goggle - the toric goggle with superior field of vision offers an unrestricted view for all conditions.

DOWNFORCE & CONTEX PRO

A modern and trending race combo, which is gaining high popularity amongst our Worldcup Rebels. With its Laminated Double Lens, the CONTEX sits closer to the eyes and offers an unrestricted view, both vertically and horizontally.

DOWNFORCE & HORIZON

A classic race combo, which will never go out of style. The cylindrical HORIZON goggle sits close to the face and is optimized for an unrestricted, horizontal view required for the tuck position. This combo is mainly recommended for smaller helmet sizes.

RACE

Protective Race Equipment from HEAD.

RADAR

THE HELMET REVOLUTION IS NOW!

Award-winning helmet with a fully integrated visor that combines the benefits of wearing a goggle with that of having a visor helmet. Lenses can be exchanged in seconds and are available in several configurations, including our new contrast-enhancing 5K Lens Technology. Our Sphere Fit system assures the perfect fit and adjustable ventilation the perfect inner helmet climate.

➤ REVOLUTIONARY DESIGN

➤ RAPID LENS EXCHANGE SYSTEM

➤ 5K LENS TECHNOLOGY

➤ SPHERE FIT SYSTEM

➤ WIND & WATER RESISTANT

KEY FEATURES

Design meets function. This innovative helmet platform is outstanding in terms of fit, functionality and usability.

RADAR VISON

The fully integrated anti-fog Double Lens features an unrestricted field of vision. Lenses can be exchanged in seconds and are available in several configurations, including our new contrast-enhancing 5K Lens Technology.

SPHERE FIT SYSTEM

The patented Sphere Fit system wraps around the head like a beanie. When adjusting the BOA® dial, it is adjusted in all three dimensions, creating a snug and comfortable fit without applying any pressure.

FIDLOCK BUCKLE

The magnets of this buckle close automatically and can be opened easily and conveniently by sliding the buckle laterally with just one hand. Even with gloves on, opening and closing the helmet will only take a moment.

ADJUSTABLE VENTILATION

The opening of the ventilation ducts on the top of the helmet may be adjusted continuously by means of slide control. Therefore, a perfect helmet climate is assured in any condition.

HELMET TECHNOLOGY

HARDSHELL TECHNOLOGY

This helmet technology is outstanding in longevity and impact protection. For this reason we use it in our race and rental helmets.

CONSTRUCTION

DUAL DENSITY CORE

This patented core technology is made from EPS with dual densities. This increases the helmets performance so it passes the FIS RH 2013 standard.

TOOLFREE CHINGUARD

The angle of our all-new Toolfree Chinguard can be adjusted individually, without using any tools. The chinguard can also be taken off, when not needed for training, or racing gates.

360° MICROSHELL

The 360° Microshell is a polycarbonate layer, which three-dimensionally wraps around the lower helmet lip, that prevents scratches and dents in the helmet's foam.

MICROSHELL

The Microshell is a polycarbonate layer that prevents scratches and dents in the foam.

MIPS

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

VENTILATION

ADJUSTABLE VENTILATION

The opening of the ventilation ducts on the top of the helmet may be adjusted continuously by means of a slide control.

THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to the inside.

ACTIVE BOTTOM EDGE

An Active Bottom Edge in HEAD helmets reduces goggle fogging by delivering active airflow. It does this by allowing air to be drawn from the goggles through the helmet.

IN-MOLD TECHNOLOGY

The shock absorbing inner EPS layer of this technology is injected into the hard outer polycarbonate layer to create a single comprehensive unit that provides perfect protection at a reduced weight.

VENTURI EFFECT

The Venturi Effect creates the ideal inner helmet climate. It does so when air passing over the helmet draws out heat and moisture from the helmets inside.

LINING

MICROFUR

Microfur is both warming and comfortable on the skin. As a helmet lining it creates the perfect fit and feel for all-day shredding.

MICROFLEECE

The soft microfleece material has several functions: It feels good, draws moisture from the skin and transports it away from the head.

BEANIE LINER

The soft microfleece material of the Beanie Liner adapts perfectly to the head and thus avoids any bruises and the unpleasant entering of cold air. Molded-in mesh zones let heat and moisture escape to the outside and, together with the ventilation system, ensure a pleasant head climate.

COMFORT ZONE LINER

Soft liner pads provide perfect fit & comfort at a fraction of the weight.

KID SPECIFIC LINER

This lining is specifically designed for kids, fully covered with soft microfleece, providing perfect fit & comfort at a fraction of the weight.

EARPADS & FITTING

NECKGATOR

The Neckgator provides comfort and warmth to the helmet wearer. It adds comfort, fit and excludes the elements.

REMOVABLE EARPADS/NECKGATOR

These ear pads and/or neckgator can be removed to suit the variable weather conditions and for cleaning.

VISOR CONSTRUCTION

HEAD's Visor Construction is a wind-sealed UV protective shield that allows skiers to ride wearing prescription glasses. Like on a motorcycle helmet the visor can be pulled down to protect the eyes while riding.

CHANGEABLE ADAPTER PLATES

Use the flat adapter plates with optimized acoustics for speed disciplines, the chin guard adapter for slalom disciplines.

SPHERE FIT

The patented Sphere Fit system wraps around the head like a beanie. When adjusting the BOA® dial, it is adjusted in all three dimensions, creating a snug and comfortable fit without applying any pressure.

SPHERE FIT AUTO

The patented Sphere Fit Auto system wraps around the head like a beanie, creating a snug and comfortable fit without applying any pressure. Using an elastic band, the fit is adapted automatically but can be adjusted by using the click system in the back of the helmet.

360° BOA® FIT

The 360° Fit System by BOA® evenly adjusts the fit of the helmet to all head shapes

HEAD 3D FIT

HEAD 3D Fit allows an exact horizontal as well as vertical adjustment of the helmet to the shape of your head.

HEAD 2D FIT

The size adjustment system may be varied horizontally in order to individually adjust the helmet to your head.

METAL CHINSTRAP BUCKLE

The Metal Chinstrap Buckle is both durable and tactile. Made from metal it also adds to the look of a HEAD helmet.

FIDLOCK BUCKLE

The magnets of this buckle close automatically and can be opened easily and conveniently by sliding the buckle laterally with just one hand. Even with gloves on, opening and closing the helmet will only take a moment.

CERTIFICATION

EN 1077:2007 CLASS B

EN 1077 is the European standard for ski & snowboard helmets, taking into account the results of collision tests to ascertain dampening and puncture resistant qualities of the outer shell. Class B of this certificate certifies helmets with soft ear protectors.

EN 1077:2007 CLASS A

The certification procedure for Class A is used for racing helmets with hard ear protectors, requiring high standards of puncture resistance.

ASTM F 2040

The North American equivalent to the European CE-Test uses comparable methods.

FIS RH 2013

These helmets comply with FIS GS/SG/DH helmet regulations.

VISORS & LENSES

INTEGRATED VISOR SYSTEM

The innovative combination of a visor helmet with the advantages of wearing a goggle are integrated into a product which is outstanding in terms of fit, style and performance. The visor automatically adapts to the wearers face and seals off wind and water.

DOUBLE LENS VISOR

The Double Lens Visor is ventilated, which prevents the lens from fogging. It provides 100% UV protection. Therefore, it is the ideal solution for mountain sports.

RAPID LENS EXCHANGE SYSTEM

Lenses can be swapped on the go with only a click. Adapt yourself to changing weather in no time!

PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

S3 
Bright and sunny conditions require a dimming lens tone.

S2 
Versatile lens for changeable weather conditions.

S1 
For cloudy or snowy days on the mountain.

5K LENS TECHNOLOGY

SEE CRYSTAL CLEAR.

Lens technology is based on the principle to filter the incoming, visible light and optimize the perception of color and contrast. Depending on the purpose of a specific lens, those filter characteristics are different and are reflected in the transmission curve. The most important factor to define the characteristics of the lens is the lens dye. The formula for this lens dye is the highest brand asset – HEAD's formula is called 5K.

- > COLOR BRILLIANCE
- > HIGH DEFINITION OF CONTRAST
- > INCREASED ATTENTION
- > FOR ALL WEATHER CONDITIONS

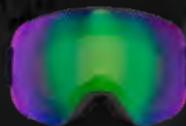

5K MODEL OVERVIEW

The new 5K Lens Technology was developed to improve your vision on the mountain. It was created to enhance contrast and boost color brilliance by filtering specific wavelengths of the visual light spectrum, therefore revealing more details and assuring a safer on-snow experience. The 5K Lens Technology is featured in several goggle platforms and also in the visor helmets RADAR and RACHEL.

SENTINEL

The SENTINEL was developed with speed in mind and offers an extreme wide field of vision, as well as a perfect race helmet integration.

MAGNIFY

The MAGNIFY offers the best field of vision. With the Magnetic Lens Exchange system lenses can be exchanged within seconds.

HORIZON 2.0

The most popular model of our line received a new, modern facelift. Lenses can be exchanged with the Speed Snap Lens Exchange system.

CONTEX PRO

The all-new CONTEX PRO ticks all boxes in terms of features, function and design. The Laminated Double Lens increases the field of vision by 15%.

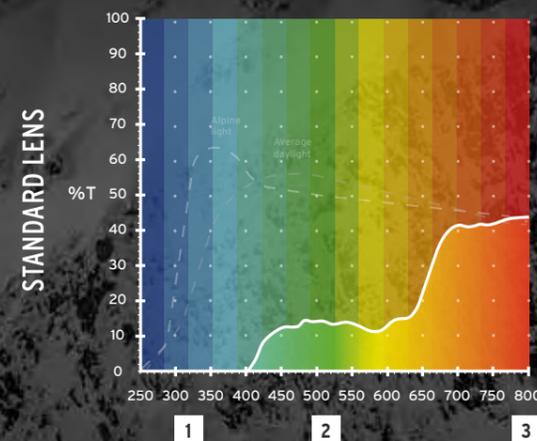

RADAR & RACHEL

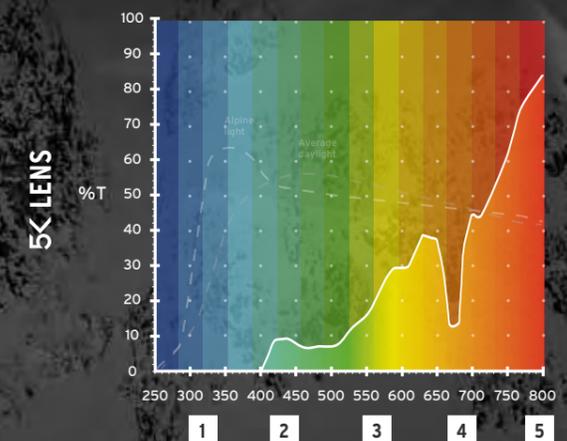

Award-winning helmet with a fully integrated visor that combines the benefits of wearing a goggle with that of having a visor helmet.

HOW DOES THE 5K LENS TECHNOLOGY WORK?

The formula to create 5K was created to specifically boost color brilliance and contrast, while not being tiring at the same time. The resulting transmission curve shows, which areas of the visible light spectrum are reduced or increased, to create this effect.

- 1 UV light is blocked
- 2 short wave lengths (bright light) is reduced
- 3 areas of long wave lengths are increased - this increases the contrast

- 1 UV light is blocked
- 2 short wavelengths (bright light) is reduced, a small peak though assures enough brightness
- 3 increasing mid wave lengths for a true, brilliant color perception
- 4 drop to boost the contrast perception
- 5 areas of long wave lengths are increased - this increases the contrast

WHICH LENS IS FOR WHAT?

The most important factor to define the characteristics of the lens is the lens dye. Depending on the formula of the dye, the filter characteristics can be optimized to only focus on specific wave lengths of the visual light spectrum, hence controlling brightness, color brilliance and contrast.

GOGGLE LINE

Our goggle line covers all aspects of the HEAD winter sports world - from professional athletes to weekend warriors, from skiers to snowboarders. For the development of our line we consider every different demand in terms of function, form and style, resulting in award-winning products that help you having the best experience on the mountain possible.

RACE

Developed together and trusted by many of the world's best alpine racers - the World-cup Rebels. This goggle line caters to the specific demands of competitive racing, together with a wide selection of available spare lenses to adapt to the ever changing weather conditions. One spare lens is included for every goggle from this category.

KEY FACTS

- > optimized for alpine racing
- > unrestricted field of vision
- > race specific spare lens program

CONTEX

The CONTEX line ticks all boxes in terms of features, function and design. Depending on the model, this platform features 5K - our new lens technology to boost color brilliance and contrast - as well as a Laminated Double Lens, which increases your field of vision by 15%. Every model in this line is available in medium and large.

KEY FACTS

- > Laminated Double Lens (PRO models only)
- > modern frame design
- > available in medium and large

NEW

- > photochromic lens option
- > limited SHAPE design

MAGNIFY

The MAGNIFY series is modern, bold and functional. No more fumbling with lenses in the cold thanks to the Magnetic Lens Exchange system. It automatically locks the lens in place and assures that you can adapt yourself to changing conditions. The toric lens offers an unrestricted field of vision and features the new contrast-enhancing 5K Lens Technology.

KEY FACTS

- > Magnetic Lens Exchange
- > big & bold design
- > OTG - Over The Glasses

NEW

- > limited SHAPE design

SOLAR

The SOLAR is a revolution in winter sports eye protection and sports a coveted ISPO WINNER award. It is a slim-line, lightweight goggle with a frame-free construction. The face foam is fitted directly onto a toric Double Lens, creating the perfect goggle for style-conscious, fun time skiers.

KEY FACTS

- > award winning model
- > big & frameless design
- > available in medium and large

HORIZON 2.0

The most popular model of our line was developed together with athletes from race and freestyle and received a new, modern facelift. It delivers supreme comfort, unmatched eye protection, function, and modern cutting-edge style. All models feature 5K Lens Technology for better contrast perception and color brilliance.

KEY FACTS

- > Speed Snap Lens Exchange
- > timeless design
- > cylindrical lens

JUNIOR

Comfortable, helmet compatible and super protective - this is our junior goggle line. All models are designed for little people and feature outstanding UV protection and anti-fogging qualities. Add to this a face foam that is both comfortable and conforms to little faces and you have the ultimate youth eye protection for the hill.

KEY FACTS

- > junior specific shapes & sizes
- > protective frame design
- > supreme UV400 protection

NEW

- > STREAM FMR models

RACE

Developed together and trusted by many of the world's best alpine racers - the Worldcup Rebels. This goggle line caters to the specific demands of competitive racing, together with a wide selection of available spare lenses to adapt to the ever changing weather conditions. One spare lens is included for every goggle from this category.

TECHBOX

MAGNETIC LENS EXCHANGE

The Magnetic Lens Exchange solution enables you to swap lenses on the go. It automatically locks the lens in place and assures that you can adapt yourself to changing weather conditions quick and easily.

OTG - OVER THE GLASSES

Prescription glasses can be worn under the goggle, as it offers enough volume on the inside to intake glasses with a width up to 13 cm. The face foam is molded on the sides, to give space to the temples of the glasses.

OPTIMIZED TRACTION STRAP

The straps of this goggle are guided over an angled ramp, therefore assuring a snug and secure fit when worn together with a helmet by optimizing the traction applied.

HORIZON 2.0

The most popular model of our line was developed together with athletes from race and freestyle and received a new, modern facelift. It delivers supreme comfort, unmatched eye protection, function, and modern cutting-edge style. All models feature 5K Lens Technology for better contrast perception and color brilliance.

TECHBOX

LAMINATED DOUBLE LENS

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.

DYNAMIC VENTILATION SYSTEM

The ventilation system is designed to allow air to enter the goggle from three sides, therefore creating an airstream which assures a perfect climate inside the goggle.

SILICONE LAYER

The Silicone Layer provides added grip between a goggle strap and on-mountain headwear. From helmets to beanies the Silicone Layer keeps goggles in place.

F-LYT

SIMPLY STUNNING.

The all new F-LYT goggle is focusing on the essentials: great look, super lightweight & easy on the budget. New technologies in combination with a new industrial design enabled us to increase the ventilation performance and anti-fog characteristics of this new model. A goggle that looks great and features everything you need - so why pay for more.

GOGGLE TECHNOLOGY

LENS

5K LENS

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual spectrum, therefore revealing more details and assuring a safer, less tiring on-snow experience in any weather condition.

PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

POLARIZED LENS

Polarized lenses are laminated with tiny vertical stripes that only allow vertically angled light to enter the wearer's eyes. Glare is eliminated because the horizontal light waves cannot bypass the vertical filter. This is resulting in increased color and contrast perception, increased attention and reduces tiring.

LAMINATED DOUBLE LENS (LDL)

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.

SCRATCH RESISTANT

The mirror coating of this lens is applied on the inside. This protects the coating from scratching or wearing off over time.

MATERIAL

WINDSEALED MAIN FRAME

Windseal Foam is a wind retardant foam. We use it in our downhill race goggles to exclude the rushing wind of racing.

VENTING FOAM

Venting Foam allows the transfer of air, heat and moisture. When used in our goggles it prevents fogging and creates the ideal climate inside a pair of goggles.

TRIPLE LAYER FOAM

Dual-density comfort foam with microfleece is a bonded foam with a soft fleece for added comfort. The two foams serve different purposes, including anti-fogging, climate regulation and padding while the fleece creates the ideal comfort layer between goggle and skin.

DOUBLE LENS

The polycarbonate double lens is a lightweight lens, that provides 100% UV protection and is 10 times more impact-resistant than conventional glass or plastic. It is therefore the ideal lens for mountain sports.

UV400 & ANTI FOG

UV400 & Anti Fog refers to the intense UV protective qualities of HEAD lenses and their ability to minimize fogging. The light on the mountain is intense so you need the best protection possible as well as anti-fogging qualities to maintain the best visibility.

FMR

FMR is HEAD's flashy mirror finish to their lenses providing added protection against sunlight. Light on the mountain is intense so riders need the best protection possible.

TORIC LENS

Toric lenses are curved in a way which avoids optical distortion and adds a bold, modern look to the goggle.

SPHERICAL LENS

A Spherical Lens has a consistent vertical and horizontal curve for a true and clear field of vision. It is both functional and looks great.

CYLINDRICAL LENS

The Cylindrical Lens is a flat lens with a single lateral curve that provides a superior field of vision. It also looks great!

DOUBLE LAYER FOAM

Comfort Foam with microfleece is a single density foam that regulates a goggles inner climate, cushions and provides the perfect skin to goggle interface.

EXTRA FACEFOAM

For customizing the fit of the goggle to your face, as well as creating the perfect match between helmet and goggle.

COMFORT FOAM

Comfort Foam is a single density foam that allows for the ideal inner goggle climate. Comfortable with venting properties it is the ideal foam for goggles.

FILTER CATEGORY

S1: For cloudy or snowy days on the mountain.

S2: Versatile lens for changeable weather conditions.

S3: Bright and sunny conditions require a dimming lens tone.

FEATURES

EXTREME WIDE FIELD OF VISION

HEAD's goggles with an extra wide field of vision are perfect for racers, allowing a tight aerodynamic tuck without impaired vision.

MAGNETIC LENS EXCHANGE

The magnetic lens exchange solution enables you to swap lenses on the go. It automatically locks the lens in place and assures that you can adapt yourself to changing weather conditions quick and easily.

SPEED SNAP LENS EXCHANGE

Speed Snap Lens Exchange is a fast and easy lens exchange system. Lenses snap in and out quickly and easily allowing a rider to keep up with the changing light conditions.

INTERCHANGEABLE LENSES

Interchangeable Lenses means that they can be changed to suit light conditions or when damaged. This increases the longevity of a goggle frame and allows for flexibility.

WIND SEAL

Protects the goggle from wind and water entering the inside.

SILICONE LAYER

The Silicone Layer provides added grip between a goggle strap and on-mountain head wear. From helmets to beanies the Silicone Layer keeps goggles in place.

OTG - OVER THE GLASSES

Prescription glasses can be worn under the goggle, as it offers enough volume on the inside to intake glasses with a width up to 13 cm. The face foam is molded on the sides, to give space to the temples of the glasses.

SPARE LENS

S3 

Bright and sunny conditions require a dimming lens tone.

S2 

Versatile lens for changeable weather conditions.

S1 

For cloudy or snowy days on the mountain.

A ONLY 3 BOOTSOLE LENGTHS

C NARROWS POSSIBLE DIN SETTINGS TO 4, 5 AND 6

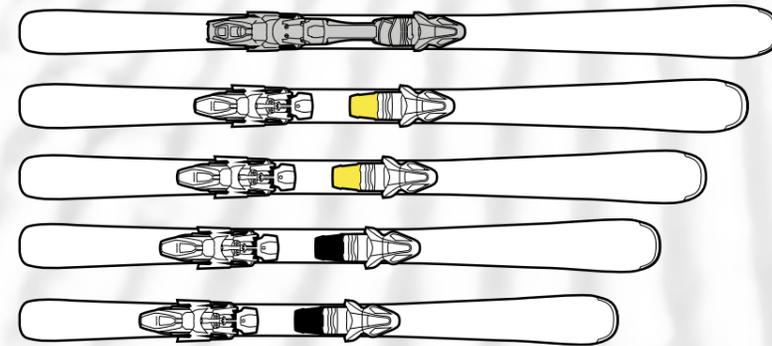

BINDING

>>> The color code speeds up the selection of matching the binding with the boot.

SKI

HEAD skis are available in 5 different sizes. Ambition Pro woodcore, 140cm to 180cm and Ambition PU core, 130cm to 170cm. All skis can be used with the BY S System.

>>> With color codes, you can easily identify the right HEAD setup immediately. All settings are pre-adjusted.

Among the bindings you can choose between the color coded fix mounted toe- and heel-piece or the adjustable SP binding (track system).

Organizing your fleet not only by size but also by preset DIN settings (4, 5, and 6) will allow you to speed up your process.

RENTAL HELMETS

HEAD
.COM

CHARTER

RENTAL SOLUTIONS

DEVELOPED AND BUILT FOR RENTAL.

The CHARTER rental helmet line was developed to offer the most durable and functional winter sports rental helmet to the market, while not looking like a rental helmet at the same time.

TEXTURED SHELL

The CHARTER features a scratch resistant shell, adding durability and an appealing matte effect.

RENTAL GOGGLE RETAINER

A new goggle retainer which does not need any screws and can easily be replaced if needed.

SPHERE FIT AUTO

The HEAD patented, free hanging Sphere Fit system assures the most comfortable and secure fit. The system adapts itself to any head circumference within the size range, but can be adjusted if needed.

HARD COVERED EARPADS

Protecting the soft parts from external hazards and abrasion.

EASY ADJUST BUCKLE

The buckle is also used to automatically adjust the length of the chin strap, while closing the helmet.

DURABILITY

The CHARTER features a scratch resistant Textured Shell, adding durability and an appealing matte effect. Combined with the durable Hardshell Construction, the Hard Covered Earpads and the new Rental Goggle Retainer, this helmet is made for rental.

USABILITY

With the patented Sphere Fit Auto system and the Easy Adjust Buckle the CHARTER can be easily adjusted and provides a perfect fit to any customer. A modern, clean helmet design which does not look like a rental helmet.

SYSTEM INTEGRATION

A subtle but visible color coding is applied to all models for size identification. In addition to that, each model features a unique barcode, which is easy to access but not visible on the outside.

CLEANIE BEANIE PACK

The Cleanie Beanie is the solution for hygienic helmet rental. The thin beanie is made from microfleece and can be worn under every helmet. Low in price, this item can be purchased by the renter and used as a thin standard beanie, also when not wearing a helmet. Available in two sizes (SR/JR) and pre-packed in a ready-to-use counter display.

HEAD RENTAL SOLUTION

HOW DOES IT WORK?

HRS uses a simple color coding:

BOOT

DEFINE THE COLOR CODE PER BOOT SIZE

											
Mondo 185 - 250	EU 29 - 39	US 13 - 6,5	Mondo 225 - 250	EU 35 - 39	US 4 - 6,5	Mondo 255 - 280	EU 39,5 - 43	US 7 - 10	Mondo 285 - 325	EU 44 - 49,5	US 10,5 - 14,5

BINDING

SELECT THE ACCORDING BINDING COLOR

			
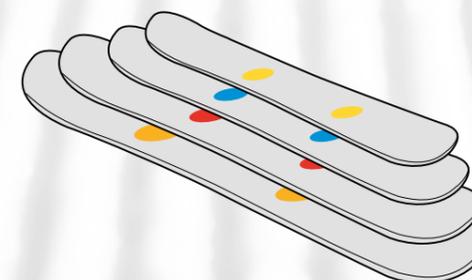

JR	S	M	L

>>> Several binding options are available per color code, in order to equip the customer with the perfect binding according to his style, needs and ability level.

BOARD

SELECT THE ACCORDING BOARD LENGTH, BASED ON ABILITY LEVEL AND HEIGHT.

-  90 - 140
-  138 - 151
-  149 - 159
-  152W- 168W

>>> We offer a variety of snowboard shapes and styles, all featuring the same 4D color coding. Therefore the fleet can be mixed without having to worry about system compatibility.

FLEX

RENTAL SOLUTIONS

RENT `N`RIDE IN 58 SECONDS. LEARN TO TURN IN 58 MINUTES.

The FLEX rental snowboard from HEAD has been in development for the last three years, with the clear goal to develop the best rental snowboard on the market, under the three key aspects of durability, usability and system integration.

- GORILLA TOPSHEET
- SOFT TORSIONAL FLEX
- INTEGRATED COLOR CODING
- EXCHANGEABLE TIP & TAIL PROTECTOR
- SPEEDDISC COMPATIBLE

DURABILITY

The Protective Frame Design, paired with the new Gorilla Topsheet and integrated, replaceable tip and tail protectors make this board bulletproof, while the retail-oriented design does not scream "I'm a rental".

USABILITY

The recessed center of the board adds torsional flexibility, which supports riders on their first days on snow, making learning and progressing easy, creating lifelong contributors to the sport.

SYSTEM INTEGRATION

A subtle but visible color coding is applied to all models for size identification. In addition to that, each model features a unique barcode, which is easy to access but not visible on the outside.

SPEEDDISC

HOW DOES IT WORK?

It's called SpeedDisk for a reason!

STEP 1

OPEN THE LEVER.

STEP 2

TURN LEVER IN OPEN POSITION.

STEP 3

PLACE THE BINDING ON THE BOARD.

STEP 4

ROTATE THE BINDING TO THE REQUIRED ANGLE.

STEP 5

TURN LEVER TO CLOSE POSITION AND LOCK.

>>> The SpeedDisk system is highly storage efficient and has proven its durability over many years of usage. In addition, it enables the rental operator to mount and adjust snowboard bindings within seconds.

TECHNOLOGY FEATURES SKI

Allride Rocker: Rocker that is equally at home on bulletproof snow as it is in powder. This profile uses early rise in the tip with regular camber throughout the rest of the ski. 20% rocker – 80% camber.

Diecut UHM C Base: This durable workhorse base material is dedicated to all forms of skiing. Diecuts are added for flare.

E Base black: Basic black never goes out of style, and it's always durable. Easy gliding is everyone's friend.

EMC: Energy Management Circuit – converts kinetic energy into electric energy, that then gets used to absorb negative vibrations.

ERA 3.0 S: “Sports version” of ERA 3.0 with a multifaceted ski designed with race innovation and inspiration, yet now with the addition of Rocker, Radius and Rebound. Totally new skiing experience with 10% rocker and 90% camber.

ERA 3.0: A masterful blend of three independently important technologies to make the ultimate allcountry skis. Rocker + Radius + Rebound = Rocker Done Right.

ERA 2.0: ERA 2.0 is the little brother of ERA 3.0 and is everything 3.0 has to offer as far as design, performance and geometry integration, but without the addition of “Rebound” with its piezoelectric elements.

Multilayer Carbon Sandwich Cap Construction: Superlight sandwich construction, triaxle weave of carbon layer combined with Graphene and additional carbon layer for more stability, make KORE one of the lightest ski in its category.

Highly transparent UHM Base: A high-density, determinedly durable base that allows gorgeous graphic details to shine through. The perfect combination of fashion and function.

Intelligence™ Technology: Piezoelectric elements is used to reduce vibrations and increase stability.

ISS – Independent Suspension System: Elastomeric vibration killers located in the tip, tail and underfoot. The elastomers quiet the vibrations that are commonly associated with rockered skis. Underfoot, the vibrations are dampened to provide the skier with a smooth ride.

Junior Power Frame: A geometric ski shape that provides structural strength to the outer edges of the ski through geometric design, as opposed to altering the core material or density of the ski. Also, for kids it looks cool and feels different than a standard flat ski.

LYT Tech Construction: By developing a ski line with lightweight Karuba wood and Graphene fully embedded we were able to increase performance while making it lighter. A unique weight distribution makes tip and tail thicker and the middle section thinner. The V-shape gives you effortless control for better steering, more stability and control.

PNP Rocker: Very subtle tip and tail rise with regular camber construction underfoot. PNP Rocker provides a rider a smother turn initiation as well as reduced edge contact to seamlessly butter into tricks and initiate spins. 30% rocker and 70% camber.

Protective Frame Design: Protective Frame Design includes a concave top to minimize scratches and slanted sides to improve durability.

Protective Frame Structure: Structured low angle sides to improve durability.

Power Sidewall Jacket: An innovation in ski construction that combines the well known fiber jacket construction with ABS sidewalls. A lightweight ski with easy skiing performance including sidewalls for better dampening, shock absorption and edge grip. Performance at its best for its great target group.

Race structured UHM C base: The highest quality, fastest base and finish known to man. The technicians who build the skis for our Worldcup Rebels use the same material and machines to put this scary fast base and structure into your skis.

RD Racing Top Sheet: A thinner topsheet material designed to maximize responsiveness. Exclusive to our RD skis.

Rebel Camber: Some years ago, it was rebellious to have rocker. Now, it's rebellious to have camber. With Rebel Camber, we feature explosive acceleration and excellent edge grip for the Worldcup Rebel inside you.

Sandwich Cap Construction: We take the basic framework from the Worldcup sandwich and place a cap that just wraps over the top edge of the sidewall to make the ski more suitable for all mountain skiing. Bomber construction with a rounded top edge makes for one incredible allcountry ski.

Sandwich Twintip Construction: We blend a full vertical laminate wood core for durability and add our bomber Independent Suspension System for killing chatter. Pipe, park, big mountains, whatever, bring 'em on and let this construction rip.

Speed Rocker: For perfect handling on hardpack – a slight tip rise on a ski with standard camber, which means great performance, easy turn initiation, and high versatility on soft snow. 10% rocker and 90% camber is just enough to take the sting out of the edges, while keeping the bite you need to turn. Speed Rocker turns HEAD performance skis into a weapon of speed with power steering. It's fast. Are you?

Structured Surface: An extra-durable topsheet with a structured exterior. Designed to hold up against the most extreme abuse.

Structured UHM C Base: The same high quality material used in HEAD's world-leading race skis is used here. Different structured running base for all conditions.

TNT Rocker: Tip and tail rocker combined with regular camber underfoot. This combination creates a surfy feel in powder while maintaining hard snow versatility. 40% rocker – 60% camber.

Tuff-Wall/Base/Edge: Impact resistant ABS sidewalls. While maintaining responsiveness, Tuffwalls are designed to take a beating. The additional use of thicker edges and running bases ensure that these models can truly be described as bullet proof.

Twintip Construction: A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving twintip construction is slightly softer than our sandwich twintip layup, making it better for learning pipe and park tricks.

UHM C Base: Our highly durable base material for getting the job done well. Not flashy, but steady and stable. The kind of base that will last for years.

Wood Core Cap Construction: A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving construction is slightly softer than our sandwich cap making it ideal for ramping up the learning curve.

Worldcup Sandwich Construction: The basic construction invented by Howard Head in the 1940's, perfected and hand built by the finest ski technicians in the modern world. The vertical laminate wood core is embraced by speedfreak phenolic sidewalls and the finest Titanal®. This is the fastest contruction on the planet. Period.

TECHNOLOGY FEATURES BINDINGS

ABS – Anti Blocking System: The exclusive TYROLIA technology of the ABS continuous band allows the boot to move out of the binding almost without any friction, hence delivering maximum safety in case of icing up, dirt and boot wear.

AFS – Anti Friction Slider: New weight optimized adapter for gliding insert at Power Bindings for reduced friction, constant release values and maximum safety.

AFS Junior: The innovative mechanical Anti Friction Slider (AFS) automatically adjusts to the boot sole height, compensating A/C standards as well as height differences due to icing up, dirt or boot wear.

AFS Metal: The 68 mm wide slider plus a stainless steel gliding element provides constant release values and results in a broader contact area to the ski boot sole.

Brakes: HEAD offers brakes with different width for optimal fit on wider skis and flat skis up to 150 mm ski width in the brake area. Some binding models are delivered without brake – “w/o brake”- to avoid brake exchange later on.

Climbing Aid: The climbing aid with its different climbing positions, which can be operated without stepping out of the binding, provides excellent balance and effortless climbing.

FHR: The new Full Heel Release Technology (FHR) delivers intelligent 180° release both horizontally and vertically ensuring maximum safety in forward and backward twisting fall situations. The FHR function can reduce ACL strain by more than 50 %*.

Freeflex Demo: These racing bindings are for rental purpose. They combine the look and performance of a racing retail binding with the functionality and durability of the rental binding.

Freeflex Pro: Best performance enabled by the innovative Freeflex Pro System. The free-gliding heel allows the ski to bend through unimpeded and to retain its natural dynamics. Due to the reduced stand height, the Freeflex band is now much closer to the ski boot. Constant release values reduce the risk of injury and ensure safe ski steering.

FR Pro Toe: The Freeride (FR) Pro Toe can be easily adjusted to different boot sole heights. Its horizontal spring reflects the modern architecture of the AAA-Series.

FR PRO³ Toe: The FR PRO³ Toe offers improved release kinematic to reduce friction and guarantees constant release values. Thanks to the improved AFD it easily adjusts to different boot sole heights. The optimal height adjustment needs to be tested with a testing device for exact adaptation of the boot-binding system and better performance on skis.

Full Diagonal: Intelligent 180° release both horizontally and vertically of the Diagonal Toe.

GripWalk Compatibility: Ski Bindings with GW in the product's name are GripWalk compatible and can be adjusted to Adult Alpine (ISO 5355) and GripWalk ski boots (within ISO 9523). Ski bindings with “GW CA” in the product's name can be used with Adult Alpine (TYPE A), Children Alpine (TYPE C), GripWalk ski boots (TYPE A & C).

GW: Bindings marked with GW will fit adult Alpine ski boots (ISO 5355 TYPE A) and adult Walk ski boots (ISO 23223 TYPE A). No further adjustment to boot sole height necessary, except ATTACK models. Optimal height shall be tested with the boot height adjustment tester.

GW CA: Bindings marked with GW CA will fit Alpine ski boots (both ISO 5355 TYPE A & TYPE C) plus all Walk ski boots (ISO 23223, TYPE A & TYPE C). No further adjustment to boot sole height necessary.

HR Heel: The HR Heel offers our new Full Heel Release Technology (FHR), a combination of horizontal and vertical release to ensure maximum safety.

JOY SLR Pro Base: The 2-piece JOY SLR Pro Base is up to 20% lighter compared to the former SLR Base. The new layer design provides more color options to match perfectly with skis.

MN: Bindings marked MN will fit adult Alpine ski boots (ISO 5355 TYPE A), adult Walk ski boots (ISO 23223 TYPE A) and all Touring ski boots (ISO 9523). The height of the AFD needs to be adjusted to the ski boot sole height. Optimal height shall be tested with the boot height adjustment tester.

NX Heel Types: 3-piece heel for easy step in and step out. Better stability and power transmission.

RX-Diagonal Heel: The RX-Diagonal Heel provides a 150° release. Thus, pressure on the knee and ligaments upon twisting forward falls are reduced.

SuperLiteRail System: In combination with the integrated Freeflex-Function the SLR Base provides better energy transmission without affecting the natural ski flex. During the turn, this SuperLiteRail Base guarantees constant force distribution which leads to flawless control, thus enhancing the on hill experience. The remarkable benefits include highly efficient and agile ski performance.

RX Toe: The performance oriented RX toe defines stability and power, much as a strong and tough bull extremely durable and absolutely reliable.

PowerRail: The unrivalled technology for retail, demo & rental by the well-received rail system on a modular basis provides easiest handling, maximum flexibility, optimized performance, perfect match, more stability and durability.

Race Diagonal: Diagonal Toe tuned for racing purposes. Due to its higher release force vertically than horizontally, it holds up to the high backward lean forces in racing.

Race Pro Heel: The stand height was reduced according to the actual FIS rules. An increased contact area reduces friction and provides constant forward pressure in all skiing situations.

SLR Pro Base: The 2-piece base provides an optimized drill pattern and an enlarged adjustment range of 120 mm. It comes in 3 different mounting positions to cover boot sole lengths between 183 mm and 363 mm.

STREAM toe: The racing toe features independent spring-loaded pincers for more precise control, two mounting positions of the gliding element for an adjustable pressure point and a steel base plate between the binding and the plate for a better power transmission. Thanks to the aerodynamic design, even faster runs are possible.

SX Heel: Based on improved kinematics the ski boot is precisely secure in the binding. This ensures exact and more direct power transmission from boot to edge.

SX Junior Toe: The innovative kinematics of HEAD's SX adult line provide advantages in performance and stability for the SX Junior line for young speedsters as well.

SX Kid Toe: With the SX kid toe for up-and-comers and integrated innovative SX kinematics ski steering now requires even less effort.

SX Lite Heel: Weight optimized heel for junior and light-weight skiers with proven safety features of the HEAD / TYROLIA binding technology.

SX Toe: The kinematic improvements are reflected in the product design of the SX toe as well. With its high cheek bones it reminds of a fox – smart, spry, agile and very clever.

SX Youth Heel: The SX Youth Heel guarantees an easier step-in and out. Due to the new shape of the sole lug and softer brakes the entry force is reduced by 15%.

Sympro: With the Rental Sympro bindings, the length of the toe and heel can be adjusted with only a few easy steps. For fast on-hill adjustment.

Symrent: With a mobile heel the Symrent bindings can be simply and very quickly adjusted to almost any size of boot.

Telescopic Tube: With only one binding model it is possible to cover the entire range of different sole lengths (from 260 mm up to 350 mm).

TRP – TYROLIA Roller Pincer System: The TYROLIA Roller Pincer Toe System (TRP System) of the HEAD bindings with its four rollers and gliding inserts ensure a 180° release and exact centering of the ski boot. The TRP system reduces the load on knees and ligaments and improves performance considerably.

*finite element model simulations by University of Innsbruck: “Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls”

TECHNOLOGY FEATURES BOOTS

LINERS

Auto Adapt Tech / Women Auto Adapt Tech: Allows the calf of the liner to widen freely. The cuff can move into the space created by the adjustable profile, to comfortably accommodate all calf sizes.

Double Power Booster Velcro: The strap of the Double Power Booster Velcro works as a double pulley for better closure and a tighter wrapping on the cuff. The elastic Booster strap allows more dynamic response on the boot. The result is more precise transmission and faster ski reaction.

HeatFit (HF) Liners: Multi-component liners with moldable inserts in liner and tongue. 5 minutes of heating, is all that is required, to make the lining adapting and get the perfect precision and comfort.

Perfect Fit 3D: Perfect fit is the revolutionary customization system that ensures comfortable, performances-oriented customization in HEAD's superb skiboots. The 3D pre-shaped construction have been developed to provide the maximum comfort and optimal adaptation to the foot shape.

Perfect Fit (PF): Perfect Fit is the revolutionary customization system that provides the best level of precision, comfort and durability. The Perfect Fit material allows the liner to adapt to your feet, ensuring maximum power transmission. 5 minutes of heating at 80 degrees, is all that is required, to make the lining adapting and get the perfect precision and comfort.

Pro Liners: Pro Series are thin and very supportive liners developed to assure maximum wrapping and extreme high performance. They come with a stretchy upper material, thermo-moldable ankle inserts and a rear sliding insert.

Quick Entry Liners: These liners come with a unique easy entry construction in the forefoot. Developed both for skiing and walking, Quick Entry liners always feel extremely comfortable.

Ratchet Velcro: The new light velcro, offers high performance, quick and efficient closure.

BUCKLES

Buckle Lock: Lock the buckle in a open position for an easy hike.

Double Power Lever: The Double Power lever reduces the effort needed to close the buckle by 50%. Developed and patented by HEAD.

Ratchet Lock: Lock the buckle's bail in place for a secure fit while ascending.

Spineflex Buckle: A revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile. The constant closure point increases the overlap between the shell flaps and reduces pressure points. The increased comfort and precision results in better performance.

Spine-Tech Buckle: The Spine-Tech buckle features a constant traction closure point. This translates into a reduction in pressure points, an increased overlap between shell flaps, more comfort, and more precision.

Superleggera Buckle: The new light buckles: 90% aluminum, simple, effective and reliable.

Supermacro Ratchet: An adjustable, ratcheted toothplate that provides 28mm of calf-adjustment.

Wide-Body Buckle: Oversize buckle designed for an extreme ease of use. The fastest way to close the boot's cuff.

FEATURES

Adjustable Rear Spoiler: Height adjustable spoiler increases rearward support as it's raised.

Bi-Inj. Frame: A high performance, multi-density shell that optimizes easy entry, foot wrapping, comfort and energy transmission.

Double Adjustable Profile: A double mechanism in the upper rear part of the boot which adapts the circumference of the cuff up to 1cm to fit individual anatomical needs. Located on the either side of the cuff's spine, this mechanism allows the cuff to adjust up to 1cm to better fit the anatomical needs of skier.

Duo Flex: Enables a progressive and reactive flex with precise ski control through all phases of the turn.

Easy Entry Shell Design: Located in the throat of the boot, 4 channels are cut into the plastic to reduce the thickness of the material and thus provide smoother entry and better wrapping to the foot.

Extended Toe Box: The longer toe box has been designed to reduce torsion and increase power transmission.

Flex Stance Tuning: Screw mechanism with a plate support on the spine of the cuff. By adding the screw(s) the link between shell and cuff becomes stronger and the flex of the boot stiffer. It also works as a forward lean adjuster.

Flex Tuning: A screw mechanism on the spine of the cuff that links shell and cuff. To get a softer flex, the screw(s) can be replaced by the plastic caps included in the box.

Form Fit: 100% customizable shell fit system. New Form Fit plastic holds modifications better than ever.

Graphene: The Graphene infused plastic combined with the new Smart Frame shell delivers the perfect balance of performance, comfort and lightweight design.

Hi-Top Tech: Direct contact between the boot tongue and shell delivers supreme support for more confident skiing.

Integrated AutoSkiWalk (ASW): HEAD patented integrated device which automatically switches between skiing and walking position when stepping in or out of the bindings.

Liquid Fit: Material provides the most precise and the quickest customization. The material's density ensures the perfect mold in the most critical area of the boot, the ankle and heel pocket. The performance and precision of a foam liner in 10 easy, comfortable minutes.

Power Control Frame: Designed to reinforce the Cube 3 line shell structure in order to give more stability and performance to the boot.

Power Plate: HEAD has designed a Velcro spoiler to increase support through the upper cuff, adding a higher level of performance.

Rubber Insert: Designed for enhanced grip when hiking.

Ski-Hike Mechanism: 53° Range of motion: provides strong, precise connection between upper and lower boot.

Smart Frame: The new lightweight shell construction is specifically designed for a more dynamic rebound that greatly improves performance for the all mountain skiers.

Stiffer/Softer Flex Adjustment: It's an adjustment placed on the spine of the cuff to select between a stiffer or softer flex depending on snow condition and level of skiing.

CUBE

Easy as 1, 2, 3. Developing our cube3 line, we decided to tackle the one challenge every skier faces every day on the mountain: To combine great skiing performance with great walking performance. After all, on any given day, we spend up to 30% of our time outside of the binding.

EASY IN

Thanks to a new quick entry geometry, the Cube3 is extremely easy to get into. Simply tilt back the shaft and step in. In addition, the 3-buckle construction with an oversized top buckle allows easy and quick buckling in and a great, snug fit.

EASY WALK

Outside of the binding, the shaft of the Cube3 is always unlocked, allowing natural walking. This, in combination with the (patented) SoftWalk heel and grip system on the heel, makes the Cube a superb walking boot.

EASY SKI

The moment you step into your binding the patented integrated AutoSkiWalk mechanism blocks the shaft, allowing you to speed off down the mountain without bowing, bending or buckling.
